## **To the Board of Directors of Azure Power Energy Limited (“APEL”)**

### **Report on Special Purpose Combined Financial Statement of Restricted Group**

We have audited the accompanying special purpose combined financial statement of Restricted Group which consist of Azure Power Energy Limited (“the Company”), a wholly owned subsidiary of Azure Power Global Limited (the “Parent”) and certain entities under common control of the Parent as listed in note 1 to the special purpose combined financial statement (collectively known as “the Restricted Group”), which comprise the combined Balance Sheet as at March 31, 2020, the combined Statements of Profit and Loss including other comprehensive income, the combined Cash Flow Statements and the combined Statement of Changes in Equity for the year ended March 31, 2020 and a summary of the significant accounting policies and other explanatory information (together hereinafter referred to as “special purpose combined financial statement”). These special purpose combined financial statement have been prepared in accordance with the basis of preparation as set out in note 3 to the special purpose combined financial statement.

### **Management’s Responsibility for the Special Purpose combined Financial Statements**

The Company’s Board of Directors is responsible for the preparation of these special purpose combined financial statement in accordance with the basis of preparation as set out in note 3 to the special purpose combined financial statement. This includes the design, implementation and maintenance of internal control relevant to the preparation of the special purpose combined financial statement that are free from material misstatement whether due to fraud or error.

### **Auditors’ Responsibility**

Our responsibility is to express an opinion on these special purpose combined financial statement based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the special purpose combined financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the special purpose combined financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the special purpose combined financial statement, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial controls relevant to the management’s preparation of the special purpose combined financial statement in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the special purpose combined financial statement.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit Opinion on these special purpose combined financial statement.

### **Opinion**

In our opinion and to the best of our information and according to the explanations given to us, these special purpose combined financial statement as at and for the year ended March 31, 2020 are prepared in

all material respects, in accordance with the basis of preparation described in Note 3 to these special purpose combined financial statement.

### **Emphasis of Matter**

We draw attention to:

1. Note 2 and 3 of the accompanying special purpose combined financial statement, which describes that the Restricted Group has not formed a separate legal group of entities during the year ended March 31, 2020, which also describes the basis of preparation, including the approach to and the purpose for preparing them. Consequently, the Restricted Group's special purpose combined financial statement may not necessarily be indicative of the financial performances and financial position of the Restricted Group that would have occurred if it had operated as a separate standalone group of entities during the periods presented. The special purpose combined financial statement has been prepared solely to comply with financial reporting requirements under the indenture governing the Senior Notes. As a result, the special purpose combined financial statement may not be suitable for any other purpose.
2. Note 4(v) of the accompanying special purpose combined financial statement which describes the uncertainties related to COVID-19 and its consequential effects on the affairs of the Restricted group.

Our Opinion is not modified in respect of above matters.

### **Other Matters**

The comparative financial information of the Restricted Group for the year ended March 31, 2019, included in these special purpose combined financial statement, were audited by the predecessor auditor who expressed an unmodified opinion on that financial information on June 19, 2019.

**1. General Information**

Azure Power Energy Limited (“APEL” or “the Company”) was incorporated on June 15, 2017 as a public company limited by shares incorporated under laws of Mauritius and a wholly-owned subsidiary of Azure Power Global Limited (the “Parent”) and has its registered office at C/o. AAA Global Services Ltd., 1<sup>st</sup> Floor, The Exchange 18 Cybercity, Ebene, Mauritius. The Company and certain subsidiaries of Azure Power India Private Limited (APIPL), collectively “The Restricted Group Entities” and “Restricted Entity” individually (as listed below) carry out business activities relating to generation of electricity through non-conventional renewable energy sources engaged in the ownership, maintenance and management of solar power plants and generation of solar energy based on long-term contracts (power purchase agreements or “PPA”) with Indian government entities as well as other non-governmental energy distribution companies and commercial customers. APEL is duly registered as Foreign Portfolio Investor Entity with the Securities Exchange Board of India for investing in debt instruments in India on July 7, 2017.

During the year ended March 31, 2018, the Company had issued US\$ Senior Notes to institutional investors and is listed on Singapore Exchange Securities Trading Limited (SGX-ST). APEL invested the proceeds, net of issue expenses in Non-Convertible Debentures (“NCDs”) and External commercial borrowings (“ECBs”) to replace existing Rupee and external debt of Restricted Group entities. Restricted entities are directly or indirectly under common control of the parent. APEL and restricted entities have been considered as “Restricted Group” for the purpose of financial reporting.

The Restricted Group entities which are under the common control of the Parent company comprises the following entities:

| Entities                                   | Principal Activity        | Country of Incorporation | % Held by Parent |                |

## 2. Purpose of the special purpose combined financial statements

These are special purpose combined financial statements, which have been prepared for the purpose of complying with financial reporting requirements under the indenture governing the US\$ Senior Notes. These special purpose combined financial statements presented herein reflect the Restricted Group's results of operations, assets and liabilities and cash flows for the year presented. The basis of preparation and significant accounting policies used in preparation of these special purpose combined financial statements are set out in note 3 and 4 below.

## 3. Basis of preparation

The indenture governing the US\$ Senior Notes requires Restricted Group to prepare Ind AS combined financial statements of the Restricted Group for the purpose of submission to the bond holders. The Ind AS combined financial statements of the Restricted Group have been prepared in accordance with recognition and measurement principles laid down by the Indian Accounting Standards (Ind AS) (except Ind AS – 33 on Earnings Per Share) prescribed under section 133 of the Companies Act, 2013, read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) (Amendment Rules), 2016, issued thereunder and other accounting principles generally accepted in India and the guidance note on Combined and Carve-out Financial Statements issued by the Institute of Chartered Accountants of India (ICAI). Further for computation of depreciation, the Restricted Group entities based upon legal opinion have charged depreciation as per Central Electricity Regulatory Commission (CERC) regulations.

Management of the Company has prepared the Special Purpose Combined Financial Statements, which comprise the Combined Balance Sheet as at March 31, 2020, the Combined Statement of Profit and Loss including other comprehensive income, Combined Statement of Cash Flows and Combined Statement of Changes in Equity for the year ended March 31, 2020, a summary of the significant accounting policies and other explanatory information.

The items in the special purpose combined financial statements have been classified considering the principles under Ind AS 1, Presentation of Financial Statements.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

The Ind AS combined financial statements have been prepared on the accrual and going concern basis and the historical cost convention, except for the following assets and liabilities which have been measured at fair value or revalued amount;

- Derivative financial instruments
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)

As per the Guidance Note on Combined and Carve Out Financial Statements, the procedure for preparing combined financial statements of the combining entities is the same as that for consolidated financial statements as per the applicable Indian Accounting Standards. Accordingly, when combined financial statements are prepared, intra-group transactions and profits or losses are eliminated. All the inter group transactions are undertaken on Arms Lengths basis. There is no allocation of expenses within the Restricted Group. The information presented in the combined financial statements of the Restricted group may not be representative of the position which may prevail after the transaction. The resulting financial position may not be that which might have existed if the combining businesses had been a stand-alone business.

The non-controlling interest held by outsiders amount to INR XX million and INR 3 million as of March 2020 and March 2019 respectively. Share capital and reserves disclosed in the combined financial statements is not the legal capital and reserves of the Restricted Group and is the aggregation of the share capital and reserves of the individual combining entities. Income taxes are arrived at by aggregation of the tax expenses actually incurred by the combining businesses, after considering the tax effects of any adjustments which is in accordance with the Guidance Note on Combined and Carve-Out Financial Statements issued by the ICAI.

Accordingly, the procedures followed for the preparation of the combined financial statements:

- (a) Combined like items of assets, liabilities, equity, income, expenses and cash flows of the combining entities.
- (b) Eliminated in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Restricted Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as fixed assets, are eliminated in full).

These Ind AS combined financial statements may not be necessarily indicative of the financial performance, financial position and cash flows of the Restricted Group that would have occurred if it had operated as a separate stand-alone Group of entities during the year presented or the Restricted Group's future performance.

The special purpose combined financial statements include the operation of entities in the Restricted Group, as if they had been managed together for the year presented.

Transactions that have taken place with the Unrestricted Group (i.e. other entities which are a part of the Group<sup>1</sup> and not included in the Restricted Group of entities) have been disclosed in accordance of Ind AS 24, *Related Party Disclosures*.

The preparation of financial information in conformity with Ind AS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Restricted Group's accounting policies.

---

<sup>1</sup> Group means parent and its subsidiaries

#### **4. Summary of significant accounting policies**

##### **a) Current versus non-current classification**

The Restricted Group presents assets and liabilities in the balance sheet based on current/non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is treated as current when it is:

- Expected to be settled in normal operating cycle
- Held primarily for the purpose of trading
- Due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets/liabilities are classified as non-current assets/liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation/settlement in cash and cash equivalents. The companies have identified twelve months as their operating cycle for classification of their current assets and liabilities.

##### **b) Property, Plant and equipment**

Capital work-in-progress, property, plant and equipment (PPE) are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of plant and equipment are required to be replaced at intervals, the Restricted Group depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognised in the carrying amount of the property, plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognised in profit or loss as incurred. The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met. Refer to note 13.1 and 38 regarding significant accounting judgements, estimates and assumptions and provisions for further information about the recorded decommissioning provision.

##### **Derecognition**

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

**c) Depreciation**

As per the legal view obtained by the Restricted Group, it is regulated under the Electricity Act, 2003; accordingly, as per the provision of section 129 of Companies Act 2013, depreciation has to be charged as per the rates notified by the CERC Regulation.

Depreciation on plant and machinery is provided using straight-line method at the rate of 5.28% - 7.00% per annum till the period of 12/13 years from the date of commencement of commercial operations as per the applicable CERC/SERC regulations.

After a period of twelve/thirteen years from the date of commencement of commercial operations, the remaining written down value at the end of the 12th/13th year from the date of commercial operations shall be depreciated over the balance useful life of the asset in the manner prescribed under applicable CERC/SERC Regulations<sup>2</sup>.

Depreciation on other items of property, plant and equipment of Restricted Group is provided as per Part C of Schedule II of the Companies Act, 2013 except in following cases where expected useful life of the assets are different from the corresponding life prescribed as under and the Restricted Group based upon the nature of asset, the operating condition of the asset, the estimated usage of the asset, past history of replacement and anticipated technological changes, believes that this is the best estimate on the basis of actual realization.

| Category               | Life as per Schedule II | Life considered |
|------------------------|-------------------------|-----------------|
| Furniture and fittings | 10 years                | 5 years         |
| Buildings              | 30 years                | 25 years        |
| Vehicles               | 8/10 years              | 5 years         |
| Office equipment       | 5 years                 | 1-5 years       |

The identified components are depreciated over their useful lives; the remaining asset is depreciated over the life of the principal asset.

Assets individually costing less than INR 5,000 are fully depreciated in the year of acquisition.

The assets' residual values and useful lives are reviewed at each financial year end or whenever there are indicators for impairment and adjusted prospectively.

**d) Capital work in progress ("CWIP")**

Capital work-in-progress includes cost of items of property, plant and equipment that are not ready for use at the balance sheet date.

**e) Leases**

Effective April 01, 2019, the Restricted Group has adopted Ind AS 116 "Leases" and applied the standard to all lease contracts existing on the date of initial application i.e. April 01, 2019. The Restricted Group has applied the modified retrospective approach for transition to Ind AS 116 with right-of-use asset (ROU) recognised at an amount equal to the lease liability adjusted for any prepayments/accruals recognised in the balance sheet immediately before the date of initial application. Accordingly, comparative financial information as of March 31, 2019 has not been retrospectively adjusted and continues to be reported under Ind AS 17.

For contracts entered into, or changed, on or after April 01, 2019, at inception of a contract, the Restricted Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Restricted Group assesses whether:

- the contract involves the use of an identified asset – this may be specified explicitly or implicitly and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified;

---

<sup>2</sup> CERC regulations prescribe estimated useful life of 25 years

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

- the Restricted Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Restricted Group has the right to direct the use of the asset. The Restricted Group has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Restricted Group has the right to direct the use of the asset if either:
  - the Restricted Group has the right to operate the asset; or
  - the Restricted Group designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Restricted Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

**Where the respective companies under the Restricted Group are lessees**

The Restricted Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the incremental borrowing rate is used.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Restricted Group is reasonably certain to exercise, lease payments in an optional renewal period if the Restricted Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Restricted Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Restricted Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Restricted Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in statement of profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Restricted Group presents right-of-use assets and lease liabilities as a separate line item on the face of the Balance Sheet.

The Restricted Group elected the transition practical expedients which allowed them (1) not to reassess whether existing contracts contain leases, (2) not to reassess initial direct costs associated with existing leases. The Restricted Group has elected to use the recognition exemptions for short-term and low value leases as per Ind AS 116.

**Under Ind AS 17**

In the comparative period, the determination of whether an arrangement was (or contained) a lease was based on the substance of the arrangement at the inception of the lease. The arrangement was, or contained, a lease if fulfilment of the arrangement was dependent on the use of a specific asset or assets and the arrangement conveyed a right to use the asset or assets, even if that right was not explicitly specified in an arrangement.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

**Where the respective companies under the Restricted Group are lessees**

A lease was classified at the inception date as a finance lease or an operating lease. A lease that transferred substantially all the risks and rewards incidental to ownership to the Restricted Group was classified as a finance lease.

Finance leases were capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments were apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges were recognised as finance costs in the statement of profit and loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Restricted Group's general policy (see note 4(f)) on the borrowing costs). Contingent rentals were recognised as expenses in the periods in which they were incurred.

A leased asset was depreciated over the useful life of the asset. However, if there was no reasonable certainty that the Restricted Group will obtain ownership by the end of the lease term, the asset was depreciated over the shorter of the estimated useful life of the asset and the lease term.

Leases, where the lessor effectively retained substantially all the risks and benefits of ownership of the leased item, were classified as operating leases. Operating lease payments were recognized as expense or income on a straight-line basis with reference to lease terms and other considerations except where-

- (i) Another systematic basis was more representative of the time pattern of the benefit derived from the asset taken or given on lease.; or
- (ii) The payments to the lessor were structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

**f) Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur. Borrowing cost includes interest and amortization of ancillary cost incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

**g) Financial instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

**Financial assets**

**Initial recognition and measurement**

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Restricted Group commits to purchase or sell the asset.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

**Subsequent measurement**

For purposes of subsequent measurement, financial assets are classified in three categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments, derivatives and equity instruments at fair value through Profit & Loss (FVTPL)

**Debt instruments at amortised cost**

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- a. The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b. Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. The category applies to the Restricted Group's trade receivables, unbilled revenue, other bank balances, security deposits etc.

**Debt instrument at fair value through other comprehensive income (FVTOCI)**

A 'debt instrument' is classified as at the FVTOCI if both of the following criteria are met:

- a. The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- b. The asset's contractual cash flows represent SPPI

Debt instruments included within the FVTOCI category are measured initially as well as at each reporting date at fair value. Fair value movements are recognized in the other comprehensive income (OCI). However, the Restricted Group recognizes interest income, impairment losses and reversals in the statement of profit and loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to statement of profit and loss. Interest earned whilst holding FVTOCI debt instrument is reported as interest income using the EIR method.

**Debt instrument at fair value through profit and loss (FVTPL)**

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Restricted Group may elect to designate a debt instrument, which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Debt instrument included within FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

**Derecognition:**

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognised (i.e. removed from the Restricted Group's balance sheet) when:

- (a) The contractual rights to receive cash flows from the asset have expired, or
- (b) The Restricted Group has transferred its contractual rights to receive cash flows from the financial asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Restricted Group has transferred substantially all the risks and rewards of the asset, or (b) the Restricted Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Restricted Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Restricted Group continues to recognize the asset to the extent of the Restricted Group's continuing involvement in the asset. In that case, the Restricted Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Restricted Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Restricted Group could be required to repay.

**Impairment of financial assets**

In accordance with Ind AS 109, the Restricted Group applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- Financial assets that are debt instruments, and are measured at amortised cost e.g. deposits, trade receivables and bank balances
- Financial asset that are debt instruments and are measured as at FVTOCI
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115.

The Restricted Group follows 'simplified approach' for recognition of impairment loss allowance for trade receivables.

The application of simplified approach does not require the Restricted Group to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Restricted Group determines whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, twelve month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in the subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on a twelve month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events on a financial instrument that is possible within 12 months after the reporting date.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

ECL is the difference between all contractual cash flows that are due to the Restricted Group in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. When estimating the cash flows, an entity is required to consider:

- All contractual terms of the financial instrument (including prepayment, extension, call and similar options) over the expected life of the financial instrument. However, in rare cases when the expected life of the financial instrument cannot be estimated reliably, then the entity is required to use the remaining contractual term of the financial instrument
- Cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms

As a practical expedient, the Restricted Group uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the statement of profit and loss. The balance sheet presentation for financial instruments is described below:

For financial assets measured at amortised cost: ECL is presented as an allowance i.e. as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write off criteria, the Restricted Group does not reduce impairment allowance from the gross carrying amount.

For assessing increase in credit risk and impairment loss, the Restricted Group combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

## **Financial liabilities**

### **Initial recognition and measurement**

Financial liabilities are classified, at initial recognition as financial liabilities at fair value through profit or loss, loans and borrowings, payables or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

The Restricted Group's financial liabilities include trade and other payables, loans and borrowings, including bank overdraft and derivative financial instruments.

### **Subsequent measurement**

The measurement of financial liabilities depends on their classification, as described below:

#### **Loans and borrowings**

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of profit and loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

**Derecognition**

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the statement of profit or loss.

**Reclassification of financial assets and financial liabilities**

The Restricted Group determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Restricted Group senior management determines change in the business model as a result of external or internal changes which are significant to the Restricted Group's operation. Such changes are evident to external parties. A change in the business model occurs when the Restricted Group either or ceases to perform an activity that is significant to its operations. If the Restricted Group reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediate next reporting period following the change in the business model. The Restricted Group does not restate any previously recognized gains, losses (including impairment gains or losses) or interest.

The following table shows various reclassifications and how they are accounted for:

| Original classification | Revised classification | Accounting treatment                                                                                                                                                                                                                                 |
|-------------------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Amortised cost          | FVTPL                  | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in statement of profit and loss.                                                                                            |
| FVTPL                   | Amortised Cost         | Fair value at reclassification date becomes its new gross carrying amount. EIR is calculated based on the new gross carrying amount.                                                                                                                 |
| Amortised cost          | FVTOCI                 | Fair value is measured at reclassification date. Difference between previous amortised cost and fair value is recognised in OCI. No change in EIR due to reclassification.                                                                           |
| FVTOCI                  | Amortised cost         | Fair value at reclassification date becomes its new amortised cost carrying amount. However, cumulative gain or loss in OCI is adjusted against fair value. Consequently, the asset is measured as if it had always been measured at amortised cost. |

**Offsetting of financial instruments**

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

**Derivative financial instruments and hedge accounting**

In the normal course of business, the Restricted Group uses derivative instruments for the purpose of mitigating the exposure from foreign currency fluctuation risks associated with forecasted transactions denominated in certain foreign currencies and to minimize earnings and cash flow volatility associated with changes in foreign currency exchange rates, and not for speculative trading purposes. These derivative contracts are purchased within the Restricted Group's policy and are with counterparties that are highly rated financial institutions. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss except for effective portion of cash flow hedges.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

***Contracts designated as Cash Flow Hedge***

At the inception of a hedge relationship, the Restricted Group formally designates and documents the hedge relationship to which the Restricted Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes the Restricted Group's risk management objective and strategy for undertaking hedge, the hedging/economic relationship, the hedged item or transaction, the nature of the risk being hedged, hedge ratio and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

The Restricted Group evaluates hedge effectiveness of cash flow hedges at the time a contract is entered into as well as on an ongoing basis. The ineffective portion of cash flow hedge is recorded as expense in statement of profit and loss. The cost of effective portion of cash flow hedges is expensed over the period of the hedge contract.

***Undesignated contracts***

Changes in fair value of undesignated derivative contracts are reported directly in statement of profit and loss along with the corresponding transaction gains and losses on the items being economically hedged. The Restricted Group enters into foreign exchange currency contracts to mitigate and manage the risk of changes in foreign exchange rates. These foreign exchange derivative contracts were entered into to hedge the fluctuations in foreign exchange rates for recognized balance sheet items such as the Restricted Group's U.S. dollar denominated borrowings. The Restricted Group has not designated the derivative contracts as hedges for accounting purposes. Realized gains (losses) and changes in the fair value of these foreign exchange derivative contracts are recorded in foreign exchange gains (losses), net in the statements of profit and loss. These derivatives are not held for speculative or trading purposes.

**h) Revenue recognition**

**Revenue from contracts with customers**

Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Restricted Group expects to be entitled in exchange for those goods or services. The Restricted Group has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods or services before transferring them to the customer.

**Sale of power**

Revenue from sale of power is recognized when persuasive evidence of an arrangement exists, the fee is fixed or determinable, solar energy kilowatts are supplied and collectability is reasonably assured. Revenue is based on the solar energy kilowatts actually supplied to customers (including the solar energy kilowatts supplied and not billed on reporting date) multiplied by the rate per kilo-watt hour agreed to in the respective PPAs. The solar energy kilowatts supplied by the Restricted Group are validated by the customer prior to billing and recognition of revenue.

The Restricted Group entities considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for the sale of power, the Group considers the effects of variable consideration and consideration payable to the customer (if any).

**Viability Gap Funding (VGF)**

The Restricted Group records the proceeds received from Viability Gap Funding (VGF) on fulfilment of the underlying conditions as deferred revenue. Such deferred VGF revenue is recognized as sale of power in proportion to the actual sale of solar energy kilowatts during the period to the total estimated sale of solar energy kilowatts during the tenure of the applicable power purchase agreement pursuant to the revenue recognition policy.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

**Interest income**

For all debt instruments measured either at amortized cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of the financial liability. When calculating the effective interest rate, the Restricted Group estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Interest income is included in other income in the statement of profit or loss.

**Rebates**

In some Power Purchase Agreements (PPAs), the Restricted Group provide rebates in invoice if payment is made before the due date. Rebates are offset against consideration payable by the customers. To estimate the variable consideration for the expected future rebate, the Group applies the most likely method.

**Contract assets**

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the entities forming part of Restricted Group perform by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

**Contract liabilities**

A contract liability is the obligation to transfer goods or services to a customer for which the entities forming part of Restricted Group have received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the entities forming part of Restricted Group transfer goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the entities forming part of Restricted Group perform under the contract.

**Trade receivables**

A receivable represents the right of entities forming part of Restricted Group to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (g) Financial instruments – initial recognition and subsequent measurement

**i) Government grants**

Grants from the government are recognised at the fair value where there is a reasonable assurance that the grant will be received and the Restricted Group will comply all with all attached conditions.

Government grant relating to income are deferred and recognised in the statement of profit and loss over the period necessary to match them with the cost that they are intended to compensate and presented within other income.

Government grant relating to purchase of property, plant and equipment are included in non- current liabilities as deferred government grant and are credited to statement of profit and loss on a straight-line basis over the expected lives of the related assets and presented within other income.

**j) Foreign currencies**

The functional currency of APEL is the United States Dollar (“US\$”) and presentation currency for special purpose combined financial statement of Restricted Group is Indian rupees (“INR”). The Restricted Group entities with operations in India use INR as the functional currency. The financial statements of APEL are translated into INR using the exchange rate as of the balance sheet date for assets and liabilities, historical exchange rates for equity transactions and average exchange rate for the year for

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

income and expense items. Translation gains and losses are recorded in accumulated other comprehensive income or loss as a component of other equity.

Functional currency is the currency of the primary economic environment in which a respective entity under Restricted Group operates and is normally the currency in which the respective entity under the Restricted Group primarily generates and expends cash.

Transactions in foreign currencies are initially recorded by the Restricted Entities at the functional currency spot rates at the date the transaction first qualifies for recognition

**Conversion**

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

**Exchange differences**

Exchange differences arising on settlement or translation of monetary items are recognized in the statement of profit and loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in other comprehensive income or statement of profit and loss are also recognized in other comprehensive income or statement of profit and loss, respectively).

**k) Retirement and other employee benefits**

Retirement benefit in the form of provident fund is a defined contribution scheme. The Restricted Group has no obligation, other than the contribution payable to the provident fund. The Restricted Group recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Retirement benefit in the form of gratuity is a defined benefit scheme. The costs of providing benefits under the scheme are determined on the basis of actuarial valuation at each year-end using the projected unit credit method. The actuarial valuation is carried out for the plan using the projected unit credit method.

The Restricted Group presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Restricted Group has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non-current liability.

The Restricted Group recognizes termination benefit as a liability and an expense when the Restricted Group has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the termination benefits fall due more than 12 months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

The interest is calculated by applying the discount rate to the net defined benefit liability. The Restricted Group recognizes the following changes in the net defined benefit obligation as an expense in the statement of profit and loss:

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Interest expense

**l) Income taxes**

Tax expense represents the sum of current tax and deferred tax of Restricted Group entities.

**Current income tax**

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities by each entity in Restricted Group. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Group operates and generates taxable income.

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the reporting date and includes any adjustment to tax payable in respect of previous years.

**Deferred Tax**

Subject to exceptions below, deferred tax is provided, using the balance sheet method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, on carry forward of unused tax credits and unused tax loss:

- deferred income tax is not recognised on the initial recognition (including MAT) of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss; and
- deferred tax assets are recognised only to the extent that it is more likely than not that they will be recovered.

Deferred tax assets and liabilities are measured at the tax rates applicable on Restricted Group that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The carrying amount of deferred tax assets (including MAT credit available) of Restricted Group is reviewed at each reporting date and is adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered

Deferred tax assets and liabilities of respective entities under Restricted Group are offset when they relate to income taxes levied by the same taxation authority and the entities intend to settle their current tax assets and liabilities on a net basis.

In the situations where one or more entities in the Restricted Group are entitled to a tax holiday under the Income-tax Act, 1961 enacted in India or tax laws prevailing in the respective tax jurisdictions where they operate, no deferred tax (asset or liability) is recognized in respect of temporary differences which reverse during the tax holiday period, to the extent the concerned entity's gross total income is subject to the deduction during the tax holiday period. Deferred tax in respect of temporary differences which reverse after the tax holiday period is recognized in the year in which the temporary differences originate. However, the group restricts recognition of deferred tax assets to the extent it is probable that sufficient future taxable income will be available against which such deferred tax assets can be realized. For recognition of deferred taxes, the temporary differences which originate first are considered to reverse first.

Current and deferred tax is recognised in the statement of profit and loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

**Minimum Alternate Tax**

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the entities forming part of the Restricted Group will pay normal income tax. Accordingly, MAT is recognised as an asset in the balance sheet when it is probable that future economic benefit associated with it will flow to the entities forming part of the Restricted Group.

**m) Segment reporting**

An operating segment is a component of the Restricted Group entities' that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the other components, and for which discrete financial information is available. All operating segments' operating results are regularly reviewed by the respective Restricted Group entities' chief operating decision maker(s) to make decisions about resources to be allocated to the segments and assess their performance. The Parent's chief executive officer is the chief operating decision maker.

The activities of Restricted Group entities mainly involve sale of electricity. Considering the nature of Restricted Group entities' business and operations, there are no separate reportable operating segments in accordance with the requirements of Indian Accounting Standard 108, 'Operating Segments' referred in to Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016 and hence, there are no additional disclosures to be provided other than those already provided in the financial statements.

**n) Provisions**

**General**

Provisions are recognized when the Restricted Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Restricted Group expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of profit or loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources would be required to settle the obligation, the provision is reversed.

**Decommissioning liability**

Upon the expiration of a PPA or, if later, the expiration of the lease agreement for solar power plants located on leasehold land, the Restricted Group is required to remove the solar power plant and restore the land. The Restricted Group records a provision for such decommissioning costs. Decommissioning costs are provided at the present value of expected costs to settle the obligation using estimated cash flows and are recognised as part of the cost of the particular asset. The cash flows are discounted at a current pre-tax rate that reflects the risks specific to the decommissioning liability. The unwinding of the discount is expensed as incurred and recognised in the statement of profit and loss as a finance cost. The estimated future costs of decommissioning are reviewed annually and adjusted as appropriate. Changes in the estimated future costs or in the discount rate applied are added to or deducted from the cost of the asset.

**o) Impairment of non-financial assets**

The Restricted Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Restricted Group estimate the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

Impairment loss is recognized when the carrying amount of an asset exceeds recoverable amount and the asset is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

The Restricted Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Restricted Group extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Restricted Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognized in the statement of profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

**p) Contingent assets/liabilities**

Contingent assets are not recognised. However, when realisation of income is virtually certain, then the related asset is no longer a contingent asset, and is recognised as an asset.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Restricted Group or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Restricted Group does not recognize a contingent liability but discloses its existence in the financial statements.

**q) Fair value measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Restricted Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

**Restricted Group**  
**Notes to special purpose combined financial statements**  
(INR amount in millions, unless otherwise stated)

---

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Restricted Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Restricted Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Restricted Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the notes 34 and 35.

**r) Cash and cash equivalents**

Cash and cash equivalents in the Balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the combined statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

**s) Events occurring after the balance sheet date**

Impact of events occurring after the balance sheet date that provide additional information materially affecting the determination of the amounts relating to conditions existing at the balance sheet date are adjusted to respective assets and liabilities.

The Restricted Group does not adjust the amounts recognised in its interim combined financial statements to reflect non-adjusting events after the reporting period.

The Restricted Group makes disclosures in the interim combined financial statements in cases of significant events.

**t) Measurement of EBITDA**

The Restricted Group has elected to present earnings before interest, tax, depreciation and amortisation (EBITDA) as a separate line item on the face of the statement of profit and loss. The Restricted Group measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the Restricted Group does not include interest income, depreciation, amortisation expense, finance cost and tax expense.

**u) Changes in accounting policy and disclosures – New and amended standards**

**i. Impact of adoption of Ind AS 116, Leases**

The Restricted Group applied Ind AS 116, Leases for the first time with effect from April 01, 2019 using modified retrospective approach on all lease contracts existing on the date of initial application.

Under modified retrospective approach for transition to Ind AS 116, the Restricted Group recognised right-of-use asset (ROU) at an amount equal to the lease liability, adjusted for any prepayments/accruals recognised in the balance sheet immediately before the date of initial application.

For contracts entered into, or changed, on or after April 01, 2019, the Restricted Group assessed at the inception of contract whether it contained a lease. A contract contained a lease, if it conveyed the right to control the use of an identified asset for a period of time in exchange for consideration.

The adoption of new accounting standard resulted in recognition of ROU asset of INR 827 million and lease liabilities of INR 785 million and derecognition of prepayments of INR 42 million. The Restricted Group has recognised the finance cost of INR 75 million and depreciation of INR 40 million on such assets and has paid lease rent of INR 46 million during the year. The comparative information continues to be reported under Ind AS 17, Leases and related interpretations. The disclosure requirements in Ind AS 116 have not been applied on the comparative information. Refer note 30 for detailed disclosure.

**ii. Impact of Taxation Laws (Amendment) Ordinance, 2019**

Pursuant to the introduction of Section 115BAA of the Indian Income Tax Act, 1961 by the Taxation Laws (Amendment) Ordinance, 2019 which is effective April 01, 2019, companies in India have the option to pay corporate income tax at the rate of 22% plus applicable surcharge and cess as against the earlier rate of 30% plus applicable surcharge and cess, subject to certain conditions like, the company has to forego all benefits like tax holidays, brought forward losses generated through tax incentives/additional depreciation and outstanding MAT credit.

Considering all the provisions under Section 115BAA and based on the expected timing of exercising of the option under Section 115BAA, the Restricted Group has re-measured its deferred tax balances which lead to reduction in deferred tax liabilities recognised till March 31, 2019 by INR 5.46 million in the current year financial statements. This requires assumptions regarding future profitability, which is inherently uncertain. To the extent assumptions regarding future profitability change, there can be increase or decrease in the amounts recognised.

**iii. Other amendments**

A number of other minor amendments to existing standards also became effective on April 01, 2019 and have been adopted by the Restricted group. The adoption of these new accounting pronouncements did not have a significant impact on the accounting policies, method of computation or presentation applied by the Restricted Group.

**iv. Standards issued but not yet effective**

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Restricted Group's financial statements are not expected to have a significant impact on the Restricted Group's financial statements. The Restricted Group has not early adopted any amendment, standard or interpretation that has been issued but is not yet effective.

**v) Impact of COVID-19 pandemic**

The Restricted Group has considered internal and external information in the preparation of special purpose combined financial statements including the economic outlook and believes that it has taken into account the possible impact of currently known events arising out of the COVID-19 pandemic. The entities within the Restricted Group has received Force Majeure notices from various power distribution companies (“DISCOMs”) stating their inability to perform their obligations under the terms of the PPA due to COVID-19. However, the Ministry of New and Renewable Energy (“MNRE”) had sent a directive to all state DISCOMs to reiterate that all renewable energy facilities in India have been granted "must run" status and this status of "must run" remains unchanged. As such, the force majeure notices from the DISCOMs have no legal effect. The power plants have remained operational as electricity generation is designated as an essential service in India. Based on the current collection experience, the Restricted Group has not seen a material impact on accounts receivables collections due to COVID-19. However, the impact assessment of COVID-19 is a continuing process given the uncertainties associated with its nature and duration. The Restricted Group will continue to monitor any material changes to future economic conditions.

The impact of COVID-19 may impact the underlying assumptions and estimates used to prepare the Restricted Group's financial statements, which may differ from that considered as at the date of approval of these financial statements

## Restricted Group

## This relates to US\$ Senior Notes.

**Azure Power (Punjab) Private Limited**

**\*Axis Bank**

Balance of INR 1 million as at March 31, 2020 (March 31, 2019: INR 1 million).

Represents an amount to be used for treating as Interest-Service Reserve account for its working capital demand loan.

**Azure Power (Haryana) Private Limited**

**\*Axis Bank**

Balance of INR 3 million as at March 31, 2020 (March 31, 2019: INR 3 million)

Represents an amount to be used for treating as Interest-Service Reserve account for its working capital demand loan.

Further, the entity has balance of INR 0.16 million as at March 31, 2020 (March 31, 2019: INR Nil).

Represents the amount of fixed deposit for bank guarantee issued to statutory authorities

**\*Indusind Bank**

Further, the entity has balance of INR 0.10 million as at March 31, 2020 (March 31, 2019: INR 0.10 million).

Represents the amount for margin against letter of credits.

**\*CBI Bank**

Balance of INR Nil as at March 31, 2020 (March 31, 2019: INR 0.27 million)

Represents the amount of fixed deposit for bank guarantee issued to statutory authorities

**Azure Urja Private Limited**

**\*Axis Bank**

Balance of INR 4 million as at March 31, 2020 (March 31, 2019: INR 4 million).

Represents an amount to be used for treating as Interest-Service Reserve account for its working capital demand loan.

**Azure Surya Private Limited**

**\*Central Bank of India (CBI)**

Balance of INR Nil as at March 31, 2020 (March 31, 2019: INR 3 million)

Represents an amount to be used for treating as Interest-Service Reserve account for its working capital demand loan.

**\*Yes Bank**

Balance of INR 3 million as at March 31, 2020 (March 31, 2019: INR 3 million)

Represents an amount to be used for treating as Interest-Service Reserve account for its working capital demand loan.

**\*Indusind Bank**

Balance of INR 57 million as at March 31, 2020 (March 31, 2019: INR 57 million)

Represents an amount of margin against Letter of credit.

**\*Foreign currency loan from bank**

During the year ended March 31, 2019, the Restricted Group has entered into buyer's credit facility amounting to US\$ 4.02 million at six months LIBOR plus 0.8% for its solar power projects. The facility is repayable in June 2021.

**\*\*5.5% Senior Notes**

During August 2017, Azure Power Energy Limited ('APEL') issued 5.5% Senior Notes ("5.5% Senior Notes" or "Green Bonds") and raised INR 31,260 million net of a discount on issue of INR 9 million at 0.03% and issuance expense of INR 586 million. The discount on issuance of the senior notes and the issuance expenses have been recorded as finance cost, using the effective interest rate method and the unamortized balance of such amounts is netted with the carrying value of the senior notes. The senior notes are listed on the Singapore Exchange Securities Trading Limited (SGX-ST). In accordance with the terms of the issue, the proceeds were used for repayment of existed loans of respective Restricted Group entities. The interest on the US\$ Senior Notes are payable on a semi-annual basis and the principal amount is payable in November 2022. As of March 31, 2020, the unamortized balance of issuance expenses including the discount on issuance of senior notes was INR 374 million and the net carrying value of the senior notes as on March 31, 2020 was INR 37,314 million. The Parent had guaranteed the principal and interest repayments to the investors, however the guarantee became ineffective on May 07, 2020 upon meeting certain financial covenants, which were met basis financial statements for the year ended March 31, 2019. (refer note 6.3 – Derivative assets)

**13. Provisions**

**13.1 Non-current**

|                                            |            |            |
|--------------------------------------------|------------|------------|
| Provision for gratuity                     | 3          | -          |
| Provision for decommissioning liabilities* | 186        | 176        |
| <b>Total</b>                               | <b>189</b> | <b>176</b> |

\*Provision has been recognised for decommissioning costs associated with solar power plants being constructed on leasehold lands. The respective entities under Restricted Group are under an obligation to decommission the plant at the expiry of the lease term before handing over the leasehold lands to the lessors.

\*During the year, the Restricted Group entities have taken working capital facility from ICICI Bank amounting to INR 1,690 million for meeting the working capital requirement for execution of the EPC contracts awarded/to be awarded to it for identified solar development projects to be set up by the Restricted Group entities. The facility bears an interest rate of 10.15% and is repayable within 12 months from the date of agreement. During the year, an amount of INR 709 million has been repaid. The loans are secured by first ranking hypothecation/other charge on current assets, book debts and receivable of the Restricted Group entities.

\*\* During the previous year, the Restricted Group entities had taken a working capital facility from Piramal Capital & Housing Finance Limited amounting to INR 1,950 million for meeting the working capital requirement for execution of the EPC contracts awarded/to be awarded to it for identified solar development projects to be set up by the Restricted Group entities. The facility carried interest rate of 12.50% and was repayable within 12 months from the date of agreement. The same has been repaid during the year. The loans were secured by first ranking hypothecation/other charge on current assets, book debts and receivable of the Restricted Group entities.

The Restricted Group follows Indian Accounting Standard (Ind AS-12) "Income Taxes", notified by the Companies (Accounts) Rules, 2015. For the entities under Restricted Group that are eligible for Tax holiday benefits under Section 80-IA of the Income Tax Act, deferred tax asset has not been created on brought forward losses at the year-end, since it is not reasonably certain whether these entities would be able to realise such losses outside the tax holiday period.

Azure Power Energy Limited is incorporated in Mauritius having applicable income tax rate of 15%. However, the restricted group's significant operations are based in India and are taxable as per Indian Income Tax Act, 1961. For effective tax reconciliation purposes, the applicable tax rate in India has been considered.

**Reconciliation of tax expense and the accounting profit multiplied by India's domestic tax rate:**

\* The Parent has guaranteed the principal and interest repayments to the investors, however, the guarantee became ineffective on May 07, 2020 upon meeting certain financial covenants, which were met basis financial statements for the year ended March 31, 2019.

**Note:**

**Terms and conditions of transactions with related parties:**

- The transactions with related parties are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year-end are unsecured and settlement occurs in cash. This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.
- Loans from/to related parties carry an interest rate of 10% - 11% p.a. and are repayable/receivable in accordance with the terms of the respective agreement.
- During the year, the Holding Company of Restricted Group entities has given a guarantee for the total working capital facility availed from ICICI Bank amounting to INR 1,690 million. Out of the total facility, loan amounting to INR 709 million has been repaid during the year.
- There has been no transaction with Key managerial personnel during the year ended March 31, 2020 and March 31, 2019.
- Refer note 6.2, 9.4 and 15.1 for loan taken from and provided to the holding company/fellow subsidiaries.

(INR amount in millions, unless otherwise stated)

**27. Segment information**

The Restricted Group primarily is carrying out business activities relating to generation of electricity through non-conventional and renewable sources (refer Note 1) which according to the management, is considered as the only business segment. Accordingly, no separate segmental information has been provided herein. The Restricted Group entities' principal operations, revenue and decision making functions are located in India and there are no revenue and non-current assets outside India.

**A. Information about revenue from major customers which is included in revenue:**

Below are the amounts recognised by the Restricted Group entities in the statement of profit and loss:

| Particulars                            | Amount     |
|----------------------------------------|------------|
| Depreciation of right-of-use assets    | 40         |
| Interest on lease liabilities          | 75         |
| Expenses relating to short-term leases | 7          |
| <b>Total</b>                           | <b>122</b> |

Below are the amounts recognised by the Restricted Group entities in the statement of cash flows:

| Particulars                   | For the year ended<br>March 31, 2020 |
|-------------------------------|--------------------------------------|
| Total cash outflow for leases | 46                                   |

**Extension options:**

Land leases contain extension options exercisable by the entities in Restricted Group before the end of the non-cancellable contract period. Where practicable, the Restricted Group entities seek to include extension options in new leases to provide operational flexibility. The extension options held are exercisable only on mutual agreement. The Restricted Group entities assess at lease commencement whether it is reasonably certain to exercise the extension options. The Restricted Group entities reassess whether it is reasonably certain to exercise the options if there is a significant event or significant change in circumstances within its control.

**Impact of adoption of Ind AS 116:**

Effective April 01, 2019, the entities in Restricted Group adopted Ind AS 116 "Leases" and applied the standard to all lease contracts existing on April 01, 2019 using the modified retrospective method. Accordingly, comparative information has not been restated and continues to be reported under Ind AS 17.

The Restricted Group entities recorded the lease liability at the present value of the remaining lease payments discounted at the incremental borrowing rate at the date of initial application and the right of use asset at an amount equal to lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the balance sheet immediately before the date of initial application.

The following is the summary of practical expedients elected on initial application:

1. Applied a single discount rate to a portfolio of leases of similar assets in similar economic environment with a similar end date
2. Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application
3. Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.
4. Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.
5. Applied the practical expedient to grandfather the assessment of which transactions are leases. Accordingly, Ind AS 116 is applied only to contracts that were previously identified as leases under Ind AS 17.

**Restricted Group****Notes to special purpose combined financial statements**

(INR amount in millions, unless otherwise stated)

The adoption of new accounting standard resulted in recognition of right-of-use asset ('ROU') of INR 827 million through recognition of Lease Liability of INR 785 million and reclassification of prepayments of INR 42 million on April 01, 2019.

The incremental borrowing rate for Restricted group is 10% per annum. The restricted group has applied the portfolio approach to determine the incremental borrowing rate as per the new accounting standard.

The table below provides explanation of difference between operating lease commitments disclosed applying Ind AS 17 at the end of the annual reporting period immediately preceding the date of initial application, discounted using the incremental borrowing rate and lease liabilities recognised in the balance sheet at the date of initial application:

| Particulars                                                                   | Amount     |
|-------------------------------------------------------------------------------|------------|
| Operating lease commitments disclosed as at March 31, 2019                    | 2,681      |
| Discounted using the lessee's incremental borrowing rate of at April 01, 2019 | 785        |
| <b>Lease liability recognised as at April 01, 2019</b>                        | <b>785</b> |
| Current lease liabilities                                                     | 52         |
| Non-current lease liabilities                                                 | 733        |

**Disclosure as per Ind AS 17, Leases for the year ended March 31, 2019:****Operating lease: Restricted Group entities as lessee**

\*The entity had entered into a Power Purchase Agreement (PPA) on 5th day of December, 2014 with Southern Power Distribution Company of Andhra Pradesh Limited for 50 MW for a period of 25 years @ Rs. 5.89/kwh. to supply power with an escalation of 3% per annum from 2nd year to 10th year and no further escalation subsequent to the 10th year until the end of the PPA.

\*\*PPA may be extended for a further period of 13 year on mutually agreed terms and conditions.

\*\*\*The entity had entered into a Power Purchase Agreement (PPA) on 5th day of December, 2014 with Southern Power Distribution Company of Andhra Pradesh Limited for 50 MW for a period of 25 years @ INR 5.89/kwh. to supply power with an escalation of 3% per annum from 2nd year to 10th year and no further escalation subsequent to the 10th year until the end of the PPA.

**b) Pending litigations:**

Some entities forming part of Restricted Group have received demand for extension charges totalling INR 415 million (March 31, 2019: INR 415 million) for projects completed beyond the contractually agreed dates. The entity has filed an appeal against such demands and has received a stay order from the appellant authorities. The management believes the reason for delay was not attributable to the entities. Further, on review of underlying facts and based on advice from its legal advisors, management believes that the entities have not accrued any amount with respect to these matters in its financial statements.

### 32. Hedging activities and derivatives

#### Contracts designated as Cash flow hedges

The Company hedged the foreign currency exposure risk related to certain investments in Restricted Group entities denominated in foreign currency through call spread option with full swap for coupon payments. The foreign currency forward contracts and options were not entered for trading or speculative purposes.

The Company documented each hedging relationship and assessed its initial effectiveness on inception date and the subsequent effectiveness was tested on a quarterly basis using dollar offset method. When the relationship between the hedged items and hedging instrument is highly effective at achieving offsetting changes in cashflows attributable to the hedged risk, the Company records in other comprehensive income the entire change in fair value of the designated hedging instrument that is included in the assessment of hedge effectiveness. The gain or loss on the hedge contracts shall be reclassified to interest expense when the coupon payments and principal repayments are made on the related investments. The hedge contracts were effective as of March 31, 2020.

Ind AS 109, Financial Instruments, permits recording the cost of hedge over the period of contract based on the effective interest rate method. The Restricted Group determined the cost of hedge at the time of inception of the contract was INR 4,931 million and recorded an expense of INR 1,054 million and INR 1,036 million during the year ended March 31, 2020 and March 31, 2019 respectively.

The following table presents outstanding notional amount and balance sheet location information related to foreign exchange derivative contracts as of March 31, 2019 and March 31, 2020:

|                                            | <b>Foreign currency option contracts</b> |                       |
|--------------------------------------------|------------------------------------------|-----------------------|
|                                            | <b>As at</b>                             | <b>As at</b>          |
|                                            | <b>March 31, 2020</b>                    | <b>March 31, 2019</b> |
| Notional Amount (US\$ denominated)         | 499.60                                   | 499.60                |
| Non-current – Other financial assets (INR) | 5,506                                    | 2,220                 |

### 33. Operation and Maintenance

Till November 30, 2019, the operations of the entities in the Restricted Group including operations and maintenance of the solar plant are managed by the employees of the Parent Company for which cost is charged by the Parent company on the basis of mutually agreed rates as per the operation and maintenance agreement entered by the companies of the Restricted Group with the Parent Company.

Effective December 01, 2019, certain employees have been transferred from parent Company to the Restricted Group entities and the operation and maintenance activities are carried out in-house by these entities. Also, the Parent Company is providing certain services to Restricted Group entities in exchange of management fees (refer note 24).

### 34. Fair values

The management assessed that cash and cash equivalents, term deposits, interest accrued on term deposits, other bank balances, trade receivables, unbilled revenue, viability gap funding receivable (VGF), receivable from related parties, security deposits received, current borrowings, interest accrued, payable for capital goods, trade payables and security deposits paid approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the price that would be received on selling of assets or paid to transfer a liability in an orderly transactions between market participants at measurement date.

The following methods and assumptions were used to estimate the fair values :

#### Measured at fair value:

\* The respective companies under the Respective Group enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Foreign currency option derivatives are valued using valuation techniques, which employs the use of market observable inputs. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies, interest rate curves and forward rate curves of the underlying instruments. The Restricted Group used the derivatives option pricing model based on the principles of the Black-Scholes model to determine the fair value of the foreign exchange derivative contracts. The inputs considered in this model include the theoretical value of a call option, the underlying spot exchange rate as of the balance sheet date, the contracted price of the respective option contract, the term of the option contract, the implied volatility of the underlying foreign exchange rates and the risk-free interest rate as of the balance sheet date.

#### At amortised cost:

\*\*Fair value of long-term loan having floating rate of interest approximate the carrying amount of those loans as there was no significant change in the Restricted Group's own credit risk during the current year.

\*\*\*The fair values of the interest-bearing borrowings and loans of Restricted Group are determined by using DCF method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. The own non-performance risk as at March 31, 2020 was assessed to be insignificant.

### 35. Fair value hierarchy

The following table provides the fair value measurement hierarchy of the assets and liabilities of the Restricted Group.

#### Quantitative disclosures fair value measurement hierarchy for assets as at March 31, 2020:

| Total                                                  | Fair value measurement using                 |                                            |                                              |
|--------------------------------------------------------|----------------------------------------------|--------------------------------------------|----------------------------------------------|
|                                                        | Quoted prices in active markets<br>(Level 1) | Significant observable inputs<br>(Level 2) | Significant unobservable inputs<br>(Level 3) |

| <b>Financial liabilities at amortised cost</b> |                                              |                                            |                                              |
| Foreign currency loan from bank                | 278                                          | -                                          | 278                                          |
| 5.5% Senior Notes                              | 34,866                                       | -                                          | 34,866                                       |

There have been no transfers between Level 1 and Level 2 during the year.

The management assessed that cash and cash equivalents, term deposits, interest accrued on term deposits, other bank balances, trade receivables, unbilled revenue, viability gap funding receivable (VGF), receivable from related parties, security deposits received, current borrowings, interest accrued, payable for capital goods, trade payables and security deposits paid approximate their carrying amounts largely due to the short-term maturities of these instruments.

## Restricted Group

### Notes to special purpose combined financial statements

(INR amount in millions, unless otherwise stated)

#### 36. Financial risk management objectives and policies

The financial liabilities of respective entities under Restricted Group comprise loans and borrowings, trade and other payables and other financial liabilities. The main purpose of these financial liabilities is to finance the respective Restricted Group entities' operations. The Restricted Group's principal financial assets include loans, investments, trade and other receivables, cash and cash equivalents and other financial assets.

The Restricted Group entities are exposed to market risk, credit risk and liquidity risk. The senior management of respective Restricted Group entities oversees the management of these risks. The Board of Directors of respective Restricted Group entities reviews and agrees policies for managing each of these risks, which are summarised below.

#### Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk. Financial instruments affected by market risk include loans and borrowings, deposits, investment in mutual funds.

The sensitivity analyses in the following sections relate to the position as at March 31, 2020 and March 31, 2019.

#### Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Restricted Group's exposure to the risk of changes in market interest rates relates primarily to the Restricted Group's long-term debt obligations with floating interest rates.

Financial instruments comprise of US\$ Senior Notes, loans to related parties which are fixed interest bearing whereas term loans from banks and financial institution are both fixed and floating interest bearing. Remaining financial assets and liabilities are non-interest bearing.

The exposure of the Restricted Group's financial instruments as at March 31, 2020 to interest rate risk is as follows:

| As at March 31, 2020  | Floating rate financial instruments | Fixed rate financial instruments | Non-interest bearing | Total  |
|-----------------------|-------------------------------------|----------------------------------|----------------------|--------|
| Financial assets      | -                                   | 8,180                            | 9,293                | 17,473 |
| Financial liabilities | 303                                 | 37,314                           | 3,367                | 40,984 |

The exposure of the Restricted Group's financial instruments as at March 31, 2019 to interest rate risk is as follows:

| As at March 31, 2019  | Floating rate financial instruments | Fixed rate financial instruments | Non-interest bearing | Total  |
|-----------------------|-------------------------------------|----------------------------------|----------------------|--------|
| Financial assets      | -                                   | 6,169                            | 5,333                | 11,502 |
| Financial liabilities | 278                                 | 35,386                           | 1,390                | 37,054 |

#### Interest Rate Sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Restricted Group's loss before tax is affected through the impact on floating rate borrowings, as follows:

|                                                | Increase/decrease in basis points |       | March 31, 2020 |       | March 31, 2019 |   |
|------------------------------------------------|-----------------------------------|-------|----------------|-------|----------------|---|
| Effect on profit/(loss) before tax (in Rupees) | +/(-)50                           | (-)/+ | 2              | (-)/+ |                | 1 |

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment. Though there is exposure on account of Interest rate movement as shown above but the Restricted Group entities minimise the foreign currency (US dollar) interest rate exposure through derivatives.

#### Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Restricted Group entities are exposed to foreign currency risk arising from changes in foreign exchange rates on foreign currency loan and derivative financial instruments. The Restricted Group entities enters into foreign exchange derivative contracts to mitigate fluctuations in foreign exchange rates in respect of these loans.

The following table analyses foreign currency risk from financial instruments relating to US\$ as of March 31, 2020 and March 31, 2019:

|                                   | March 31, 2020 | March 31, 2019 |
|-----------------------------------|----------------|----------------|
| <b>Borrowings</b>                 |                |                |
| - Foreign currency loan from bank | 303            | 278            |
| - 5.5% Senior Notes*              | 38,166         | 34,900         |

\* Including interest accrued but not due on borrowings of INR 852 million (March 31, 2019: INR 783 million).

#### Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD/Rupee exchange rates, with all other variables held constant. The impact on the Restricted Group's loss before tax is due to changes in the fair value of monetary liabilities.

|                                                | Change in USD rate |       | March 31, 2020 |       | March 31, 2019 |  |
|------------------------------------------------|--------------------|-------|----------------|-------|----------------|--|
| Effect on profit/(loss) before tax (in Rupees) | +/(-)5%            | (-)/+ | 1,923          | (-)/+ | 1,759          |  |

As the Restricted Group has entered into foreign exchange derivatives contract to mitigate the foreign exchange fluctuation risk, these derivatives act as economic hedges and will offset the impact of any fluctuations in foreign exchange rates.

## Restricted Group

### Notes to special purpose combined financial statements

(INR amount in millions, unless otherwise stated)

#### Credit risk

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Restricted Group entities are exposed to credit risk from their operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

#### Trade receivables

Customer credit risk is managed on the basis of Restricted Group's established policy, procedures and control relating to customer credit risk management. Outstanding customer receivables are regularly monitored. The Restricted Group evaluates the concentration of risk with respect to trade receivable as high. However, since the trade receivables mainly comprise of state utilities/government entities, the Restricted Group does not foresee any credit risk attached to receivables from such state utilities/government entities. The Restricted Group does not hold collateral as security.

#### Movement in expected credit loss on trade receivables during the year (refer note 4(g)):

|                                                                                | For the year ended<br>March 31, 2020 | For the year ended<br>March 31, 2019 |

| Additional provision (net) towards credit impaired receivables during the year | 170                                  | 11                                   |
| Written off during the year                                                    | -                                    | (43)                                 |
| <b>Closing balance</b>                                                         | <b>181</b>                           | <b>11</b>                            |

#### Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Restricted Group's treasury department in accordance with its policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counter party. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

#### Liquidity risk

Liquidity risk is the risk that Restricted Group entities will encounter in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The approach of Restricted Group entities to manage liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risk damage to its reputation.

The Restricted Group entities assessed the concentration of risk with respect to refinancing its debt and concluded it to be low. The Restricted Group has access to a sufficient variety of sources of funding and debt maturing within 12 months.

Non-current borrowings of Restricted Group include INR 37,314 million of senior notes which may be subject to refinancing risk, when they becomes due, as market conditions may not be possible to refinance the bonds at all or to refinance the bonds on favorable terms. In addition, hedges taken on these bonds are covered from INR 63.6/US\$ to INR 90.0/US\$, which may expose Restricted Group to additional hedging costs in the future. Furthermore, the recent rating downgrade of India by Moody's, a first in over two decades, as well as a negative outlook for India, may in future make global access to funds difficult.

The table below summarises the maturity profile of the Group's financial liabilities based on contractual undiscounted payments. The table below summarises the maturity profile of the Restricted Group's financial liabilities based on contractual undiscounted payments.

\*\*Including interest on non-current borrowings

### 37. Capital management

For the purpose of the Restricted Group's capital management, capital includes issued share capital, securities premium and all other equity reserves attributable to the equity holders of the respective entities of Restricted Group. The primary objective of the Restricted Group's capital management is to maximise the shareholder's value of the respective entity of Restricted Group.

The respective entity of Restricted Group manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the respective entity may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The respective entity monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Restricted Group includes within net debt, interest bearing loans and borrowings, trade and other payables, less cash and cash equivalents.

| Particulars                                            | As at March 31, 2020 | As at March 31, 2019 |

| <b>Gearing ratio (%)</b>                               | <b>80.2%</b>         | <b>78.2%</b>         |

\* The Restricted Group has adjusted the Inter Group Borrowings to/from holding and fellow subsidiary in borrowings.

\*\* The Restricted Group has trade receivables of INR 2,749 million as at March 31, 2020 (March 31, 2019: INR 2,323 million).

\*\*\* This includes other bank balances, which the Restricted Group has invested in term deposits.

In order to achieve this overall objective, the Restricted Group entities' capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any interest-bearing loans and borrowing in the current year.

No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2020 and March 31, 2019.

### **38. Significant accounting judgements, estimates and assumptions**

The preparation of the Restricted Group financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

#### **A. Judgements**

In the process of applying the entity's accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the financial statements:

##### **(i) Revenue from Viability Gap Funding (VGF)**

The Restricted Group records the proceeds received from Viability Gap Funding (VGF) on fulfilment of the underlying conditions as deferred revenue. Such deferred VGF revenue is recognized as sale of power in proportion to the actual sale of solar energy kilowatts during the period to the total estimated sale of solar energy kilowatts during the tenure of the applicable power purchase agreement pursuant to the revenue recognition policy.

##### **(ii) Classification of leases:**

The Restricted Group evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgement. The Restricted Group uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Restricted Group determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Group is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Group is reasonably certain not to exercise that option. In assessing whether the Group is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Group to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Group revises the lease term if there is a change in the non-cancellable period of a lease.

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

#### **B. Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Restricted Group based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Restricted Group. Such changes are reflected in the assumptions when they occur.

##### **(i) Impairment of non-financial assets**

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The fair value less costs of disposal calculation is based on available data from binding sales transactions, conducted at arm's length, for similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a Discounted Cash Flow (DCF) model. The cash flows are derived from the budget for the next remaining useful life of the projects Restricted Group entities. The recoverable amount is sensitive to the discount rate used for the DCF model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes.

##### **(ii) Hedging activities and derivatives**

The Company has issued 5.5% Senior Notes in August, 2017, listed on the Singapore Exchange Limited ("SGX"). The proceeds were used for repayment of loan of Restricted Group entities, in the form of intercompany Non-Convertible Debentures (NCD) and External Commercial Borrowings (ECB's) denominated in INR. The exchange rate risk on the proceeds invested from the US\$ Senior Notes are hedged through cross currency swap for payment of coupons and through call spread option contracts for repayment of principal (collectively "Option contracts"). The Restricted Group designated these option contracts as a cashflow hedge. These options contracts mitigate the exchange rate risk associated with the forecasted transaction for semi-annual repayment of coupon and for repayment of the principal balance at the end of five years.

The cashflow from the underlying agreement match the terms of a hedge such as – notional amount, maturity of the option contracts, mitigation of exchange rate risk, and there are no significant changes in the counter party risk, hence they are designated as a cashflow hedge in accordance with Ind AS 109, Financial Instruments (also refer note 4(v)).

**(iii) Revenue estimate**

Where power purchase agreements (PPAs) include scheduled price changes, revenue is recognized at lower of the amount billed or by applying the average rate to the energy output estimated over the term of the PPA. The determination of the lesser amount is undertaken annually based on the cumulative amount that would have been recognized had each method been consistently applied from the beginning of the contract term. The Restricted Group estimates the total kilowatt hour units expected to be generated over the entire term of the PPA. The contractual rates are applied to this annual estimate to determine the total estimated revenue over the term of the PPA. The Restricted Group then uses the total estimated revenue and the total estimated kilo-watt hours to compute the average rate used to record revenue on the actual energy output supplied. The Restricted Group compares the actual energy supplied to the estimate of the energy expected to be generated over the remaining term of the PPA on a periodic basis, but at least annually. Based on this evaluation, the Restricted Group reassesses the energy output estimated over the remaining term of the PPA and adjusts the revenue recognized and deferred to date. The difference between actual billing and revenue recognized is recorded as deferred revenue.

**(iv) Taxes**

Projects of Restricted Group qualify for deduction from taxable income because its profits are attributable to undertakings engaged in development of solar power projects under section 80-IA of the Indian Income Tax Act, 1961. This holiday is available for a period of ten consecutive years out of fifteen years beginning from the year in which the Restricted Group generates power ("Tax Holiday Period"), however, the exemption is only available to the projects completed on or before March 31, 2017. The Restricted Group anticipates that it will claim the aforesaid deduction in the last ten years out of fifteen years beginning with the year in which the Restricted Group generates power and when it has taxable income. Accordingly, its current operations are taxable at the normally applicable tax rates. Due to the Tax Holiday Period, a substantial portion of the temporary differences between the book and tax basis of the Restricted Group's assets and liabilities do not have any tax consequences as they are expected to reverse within the Tax Holiday Period.

**(v) Fair value measurement of financial instruments**

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values.

Assumptions include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

**(vi) Provision for decommissioning**

The Restricted Group has recognised provisions for the future decommissioning of solar power plants set up on leased land at the end of the lease term or expiry of power purchase agreement. In determining the fair value of the provision, assumptions and estimates are made in relation to discount rates, the expected cost to dismantle and remove the plant from the leased land and the expected timing of those costs. The carrying amount of the provision as at March 31, 2020: INR 186 million (March 31, 2019: INR 176 million). The Group estimates that the costs would be realised in 25 years' time upon the expiration of the lease and calculates the provision using the DCF method based on the following assumptions:

- ▶ Estimated range of cost per megawatt– INR 0.35 million to INR 0.55 million (March 31, 2019: INR 0.35 million to INR 0.55 million)
- ▶ Discount rate – 6.9% (March 31, 2019: 9.0%)

**(vii) Depreciation on property, plant and equipment**

As per the legal view obtained by the Restricted Group, it is regulated under the Electricity Act, 2003 accordingly as per the provision to section 129 of Companies Act, 2013, depreciation has to be charged as per the rates notified by the CERC Regulation.

Depreciation on other fixed assets of the Restricted Group is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management. The management has re-estimated useful lives and residual values of all its property, plant and equipment. The management based upon the nature of asset, the operating condition of the asset, the estimated usage of the asset, past history of replacement and anticipated technological changes, believes that depreciation rates currently used fairly reflect its estimate of the useful lives and residual values of property, plant and equipment, though these rates in certain cases are different from lives prescribed under Schedule II of the Companies Act, 2013.

---

**39. Events after the reporting period**

In response to the COVID-19 outbreak, the Restricted Group implemented a number of initiatives to ensure business continuity, including ensuring the safety and health of its employees. The situation of the COVID-19 outbreak is still evolving and the Restricted Group is closely monitoring its impact on its business. The impact assessment of COVID-19 is a continuing process given the uncertainties associated with its nature and duration. The Restricted Group will continue to monitor any material changes to future economic conditions.

**40. Reclassification**

For the purpose of these special purpose combined financial statements, figures of audited individual financial statements of entities forming part of the Restricted Group have been regrouped /reclassified where necessary.

**Restricted Group****Results of operations – Special purpose combined financial statements**

(INR amount in millions, unless otherwise stated)

---

**Year ended March 31, 2020 Special Purpose Combined Financial Results:****Operating Revenue*****Sale of power***

Operating revenue for the year ended March 31, 2020 was INR 6,179 million, a decrease of 1.2% from INR 6,254 million as compared to the year ended March 31, 2019. The decrease in revenue was driven by the lower insolation/ degradation.

***Other income***

Other income for the Restricted Group for the year ended March 31, 2020 was INR 27 million, an increase of 59% from INR 17 million as compared to the year ended March 31, 2019. The increase was primarily due to gains on disposal of current investments/ mutual funds.

***Employee benefits expense***

Employee benefits expenses during the year ended March 31, 2020 increased by INR 15 million from INR 4 million as compared to the year ended March 31, 2019. The principal reason for the increase was due to higher employees in the Restricted Group entities during the year as operation and maintenance activities have been internalized.

***Operating expenses (exclusive of depreciation and amortization)***

Operating expense for the year ended March 31, 2020 increased by 26% to INR 833 million from INR 660 million for the year ended March 31, 2019. The increase was primarily due to provision for doubtful receivables (non-cash) created during the year.

***Depreciation expense***

Depreciation expense during the year ended March 31, 2020 increased by 4%, to INR 2,368 million from INR 2,278 million as compared to the year ended March 31, 2019. The principal reason for the increase was due to increase in the property, plant and equipment and additional depreciation on leases post adoption of IND AS 116 effective 1 April 2019.

***Finance income***

Finance income mainly consist of interest income. Finance income during the year ended March 31, 2020 increased by INR 177 million, or 34%, to INR 697 million as compared to the year ended March 31, 2019 as a result of an increase in interest income on term deposits and inter corporate deposits during the period.

***Finance cost***

Net interest expense during the year ended March 31, 2020 increased by 7%, to INR 3,532 million from INR 3,316 million as compared to the year ended March 31, 2019. The primary reason is increase in interest expense on Green Bonds due to depreciation of Indian Rupee against U.S dollar, increase in current borrowings and consideration of interest component of lease accounting, post adoption of IND AS 116 effective 1 April 2019.

***Tax expenses***

Income tax expense for the Restricted Group during the year ended March 31, 2020 increased by INR 382 million, or 186%, to INR 587 million, as compared to the year ended March 31, 2019. The increase in income tax expense was largely attributable to increase in taxable income and deferred tax expenses.

***Net profit / Loss after tax***

Net loss after tax was INR 436 million for the year ended March 31, 2020, compared profit after tax of INR 328 million during the year ended March 31, 2019. The increase in loss in current year was primarily due to the increase in operating expenses, depreciation and tax expense and marginal reduction in sale of power, as compared to last year.

***Cash flow from operating activities***

Cash generated from operating activities for the year ended March 31, 2020 was INR 4,926 million, as compared to INR 4,778 million during the year ended March 31, 2019, primarily due to higher realisation from trade receivables of projects during the year ended March 31, 2020 as compared to last year.

***Cash flow from investing activities***

Cash generated from investing activities for the year ended March 31, 2020 was INR 212 million, as compared cash used in investing activities of INR 3,532 million during the year ended March 31, 2019, primarily due to settlements of inter-corporate deposits/ current investments.

***Cash flow from financing activities***

Cash utilised from financing activities was INR 3,600 million for the year ended March 31, 2020, as compared to cash utilised financing activities of INR 2,634 million during the year ended March 31, 2019. This is primarily due to repayment of current borrowings, related to the working capital facility taken in the RG previous year.

***Liquidity Position***

As of March 31, 2020, Restricted Group had INR 2,133 million of cash, cash equivalents and other bank balances.

***Combined Earnings before interest, tax, depreciation and amortisation (EBITDA)***

Combined EBITDA of Restricted Group was INR 5,354 million for the year ended March 31, 2020, compared to INR 5,607 million during the year ended March 31, 2019. The decline in EBITDA was primarily due to the increase in operating expenses during the year as compared to last year.
