CHAIRMAN'S STATEMENT

On behalf of the Board of Directors of Chin Teck Plantations Berhad, I take great pleasure in presenting the Annual Report and the Audited Financial Statements of the Group and of the Company for the financial year ended 31 August 2006.

During the financial year under review, the average selling price of crude palm oil remained steady. Demand for palm oils is expected to increase due mainly to the worldwide increase in demand for bio-diesel and also the high demand for food production use, in particular, to produce trans fatty acid free products.

Financial And Operations Review

During the financial year under review, revenue of the Group decreased by 12.40% to RM83,188,735. Overall operating expenses decreased by 0.77% to RM51,917,901. Other operating income increased by 4.07% to RM5,942,902. Profit from operations decreased by 23.05% to RM37,213,736.

The average selling price of crude palm oil was marginally higher. However, the average selling price of palm kernel was lower. Overall operating expenses were lower due mainly to a decrease in the production of ffb.

Production of ffb decreased by 11.47% to 214,746 m/t and purchases of ffb decreased by 1.87% to 37,053 m/t. Correspondingly, production of crude palm oil decreased by 11.75% to 47,648 m/t and production of palm kernel decreased by 9.75% to 13,927 m/t.

Approximately 42.19% of the matured palms are more than 20 years of age. During the financial year under review, an additional 766 hectares of old and low yield palms were replanted. As at the end of the financial year, total replanted and immature area was 1,260 hectares. Replanting of approximately 624 hectares of old and low yield palms will take place during the financial year ending 31 August 2007.

The increase in other operating income was due mainly to an increase in the amount of gain on sale of quoted investment and unrealised gain on foreign exchange.

The Group suffered an overall loss in its share of results of associates due mainly to loss suffered by its associate engaged in joint ventures on food manufacturing in the People's Republic of China.

Overall, profit after taxation of the Group under review decreased by 35.15% to RM22,495,835 from RM34,690,734.

Shareholders' equity increased by 3.04% to RM438,974,433 from RM426,010,686.

Dividends

Total gross dividends of 30% in respect of the financial year ended 31 August 2006 were paid during the financial year. i.e. a first interim dividend of 15% less 28% taxation was paid on 20 January 2006 and a second interim dividend of 15% less 28% taxation was paid on 31 July 2006. In view of the payment of the interim dividends, the Board has not recommended any final dividend in respect of the financial year ended 31 August 2006. However, a first interim dividend of 15% less 27% taxation in respect of the financial year ending 31 August 2007 was declared on 26 December 2006 and made payable on 31 January 2007.

CHAIRMAN'S STATEMENT

Joint ventures on oil palm plantations in Indonesia

- (i) On 10 April 2006, the Company entered into a conditional joint venture and shareholders agreement with Negeri Sembilan Oil Palms Berhad, Timor Oil Palm Plantation Berhad, Eng Thye Plantations Berhad, Seong Thye Plantations Sdn Bhd and Chin Thye Investment Pte Ltd ("Singapore JVSA") to participate in a joint venture project for the development of an oil palm plantation located at the Regency of Ogan Komering Ilir, South Sumatera Province, Indonesia with P.T. Lampung Karya Indah.

The said joint venture is expected to enhance the future earnings potential of the Group and is in line with the long term strategy of the Group in increasing its oil palm plantation interest.

The approval of the shareholders of the Company was obtained at the Extraordinary General Meeting of the Company held on 26 May 2006. The conditions precedent as set out in the Singapore JVSA have been fulfilled and the necessary approvals required for the subscription of shares in Chin Thye Investment Pte Ltd have been obtained on or before 1 June 2006. Pursuant to the Singapore JVSA, the Company subscribed for 7,200,000 shares in Chin Thye Investment Pte Ltd at S\$1.00 per share for a total cash subscription sum of RM16,898,410 on a pro-rata basis.

Approximately 300 hectares of land have been cleared of which 200 hectares have been planted.

- (ii) For the estates in Lampung and Padang, approximately 20,000 hectares of land have been planted, of which approximately 7.32% are of age 10 and 11 years old and 43.59% are of age below 10 years old.

For the financial year ended 31 August 2006, the estates in Lampung contributed approximately RM1,285,000 to the profit before taxation of the Group. However, the Group suffered a loss before taxation of approximately RM1,256,000 from the estate in Padang due mainly to high operating costs, as the matured palms are relatively young.

The Board is optimistic that the joint venture will contribute positively and significantly to the Group's future earnings when the immature palms attain maturity and enter the prime production cycle.

Joint venture on property development

The property development project, Bandar Springhill, is a 1,990 acres integrated township. It is one of the largest township developments in Negeri Sembilan and it opens up a new growth region along the Seremban-Port Dickson highway near Lukut. With modern life-style concepts incorporated in its planning, it devotes generous space to lakes, parks and landscaping and provides wide roads for efficient traffic dispersal.

The project has received favourable response. Since 1997, 1,999 units of mixed properties consisting of a range of contemporary homes were sold. For the financial year ended 31 August 2006, the joint venture contributed approximately RM816,000 to the profit before taxation of the Group.

Joint venture on food manufacturing in People's Republic of China

The associates of Gaeronic Pte Ltd (a 24.88% owned associate of the Group) operate in profitable conditions. Its subsidiaries had taken a marketing and promotional campaign for brand building in the year 2006 with the objective of generating higher revenue. As a result, advertisement expenses had increased substantially and the Group suffered an overall loss before taxation of approximately RM4,753,000 from the joint venture for the financial year ended 31 August 2006. The marketing and promotional campaign has since shown positive results and a turnaround is expected in 2007.

During the financial year under review, the Company increased its issued and paid-up share capital from RM91,159,250 to RM91,363,250 by way of issuance of new ordinary shares of RM1.00 each, for cash, pursuant to the Employee Share Option Scheme ("ESOS"). The ESOS lapsed on 30 January 2006. The Board has decided not to implement a new scheme for the time being.

Recurrent Related Party Transactions

The Company announced on 31 October 2006 that it proposes to seek the approval of shareholders for the proposed renewal of shareholders' mandate for the Group to enter into recurrent related party transactions of a revenue or trading nature at the forthcoming Annual General Meeting. A separate Circular to Shareholders, the purpose of which is to provide information on the proposed renewal of shareholders' mandate and to seek the approval for the ordinary resolutions pertaining to the proposed renewal of shareholders' mandate, is enclosed together with the Annual Report.

Outlook For Year 2007

Since the end of the previous financial year, the average selling price of crude palm oil has increased substantially. However, overall production of fresh fruit bunches of the Company is expected to be lower due mainly to the ongoing replanting programme. Barring unforeseen circumstances, the Company is confident that with the price of crude palm oil likely remaining strong, the overall performance for the financial year ending 31 August 2007 would be satisfactory.

The financial statements comply with the provisions of the Companies Act, 1965 and applicable MASB Approved Accounting Standards in Malaysia.

(b) Basis of Consolidation

(i) Subsidiary

The consolidated financial statements include the financial statements of the Company and its subsidiary. A subsidiary is an entity in which the Group has power to exercise control over the financial and operating policies so as to obtain benefits from its activity.

The subsidiary is consolidated using the acquisition method of accounting. Under the acquisition method of accounting, the results of the subsidiary are included in the consolidated income statement from the effective date of acquisition. The assets and liabilities of the subsidiary are measured at their fair values at the date of acquisition. The difference between the cost of the acquisition and the fair value of the Group's share of the net assets of the acquired subsidiary at the date of acquisition is included in the consolidated balance sheet as goodwill or negative goodwill arising on consolidation. NOTES TO THE FINANCIAL STATEMENTS
31 AUGUST 2006

2. Significant Accounting Policies (Contd.)

(b) Basis of Consolidation (Contd.)

(ii) Associates

Associates are those entities in which the Group exercises significant influence but not control, through participation in the financial and operating policy decisions of the entities.

Investments in associates are accounted for in the consolidated financial statements by the equity method of accounting based on the audited or management financial statements of the associates. Under the equity method of accounting, the Group's share of profits less losses of associates during the financial year is included in the consolidated income statement. The Group's interest in associates is carried in the consolidated balance sheet at cost plus the Group's share of post-acquisition retained profits or accumulated losses and other reserves as well as goodwill on acquisition.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are eliminated unless costs cannot be recovered.

(iii) Jointly Controlled Entity

A jointly controlled entity is an entity in which the Group has joint control over its economic activity established under a contractual arrangement.

Investment in jointly controlled entity is accounted for in the consolidated financial statements by the equity method of accounting based on the audited or management financial statements of the jointly controlled entity. Under the equity method of accounting, the Group's share of profits less losses of jointly controlled entity during the financial year is included in the consolidated income statement. The Group's interest in jointly controlled entity is carried in the consolidated balance sheet at cost plus the Group's share of post-acquisition retained profits or accumulated losses and other reserves.

Unrealised gains on transactions between the Group and its jointly controlled entity are eliminated to the extent of the Group's interest in the jointly controlled entity. Unrealised losses are eliminated unless costs cannot be recovered.

(c) Investments in Subsidiary, Associates and Jointly Controlled Entity

The Company's investments in subsidiary, associates and jointly controlled entity are stated at cost less impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(j).

On disposal of such investments, the difference between net disposal proceeds and their carrying amounts is recognised in the income statement.

NOTES TO THE FINANCIAL STATEMENTS
31 AUGUST 2006

2. Significant Accounting Policies (Contd.)

(d) Property, Plant and Equipment and Depreciation

Property, plant and equipment are stated at cost or valuation less accumulated depreciation and impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(j).

Freehold and long term leasehold estates represent freehold and long term leasehold land and new planting expenditure.

The freehold estates and a long term leasehold estate of the Group and of the Company have not been revalued since their revaluation in 1983. The directors have not adopted a policy of regular revaluations of such assets. In accordance with the transitional provisions issued by the MASB on adoption of FRS 116 Property, Plant and Equipment, the valuation of these assets has not been updated, and they continue to be stated at their existing carrying amounts less accumulated depreciation.

Any revaluation increase is credited to equity as a revaluation surplus, except to the extent that it reverses a revaluation decrease for the same asset previously recognised as an expense, in which case the increase is recognised in the income statement to the extent of the decrease previously recognised. A revaluation decrease is first offset against unutilised previously recognised revaluation surplus in respect of the same asset and the balance is thereafter recognised in the income statement.

Freehold estates are not depreciated. Long term leasehold land is depreciated over the period of the respective leases of 86 and 99 years.

Depreciation of other property, plant and equipment is provided for on a straight line basis to write off the cost of each asset to its residual value over the estimated useful life, at the following annual rates:

| | |
|--|----------|
| Buildings | 2% - 10% |
| Plant and machinery | 10% |
| Motor vehicles | 20% |
| Office and estate equipment and furniture and fittings | 5% - 10% |

Upon disposal of an item of property, plant and equipment, the difference between the net disposal proceeds and the net carrying amount is recognised in the income statement and the unutilised portion of the revaluation surplus on that item is taken directly to retained profits.

(e) New Planting Expenditure

New planting expenditure incurred on land clearing and upkeep of oil palms to maturity are capitalised under estate costs and are not depreciated.

(f) Replanting Expenditure

Replanting expenditure incurred in the financial year is recognised in the income statement. Replanting expenditure represents the total cost incurred from land clearing to the point of harvesting.

2. Significant Accounting Policies (Contd.)

(g) Inventories

Inventories of oil palm produce and estate stores are stated at the lower of cost (determined on a weighted average basis) and net realisable value. Cost of inventories of oil palm produce includes, where appropriate, the cost of direct materials, direct labour and appropriate production overheads. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

(h) Cash and Cash Equivalents

For the purpose of the cash flow statements, cash and cash equivalents include cash on hand and at banks and deposits at call, net of deposits pledged to financial institutions.

The statements of cash flows are prepared using the indirect method.

(i) Foreign Currency

Transactions in foreign currencies are initially recorded in Ringgit Malaysia at rates of exchange ruling at the date of transactions. At each balance sheet date, foreign currency monetary items are translated into Ringgit Malaysia at exchange rates ruling at that date. Non-monetary items initially denominated in foreign currencies, which are carried at historical cost are translated using the historical rate as of the date of acquisition and non-monetary items which are carried at fair value are translated using the exchange rate that existed when the values were determined.

All exchange rate differences are taken to the income statement.

The Group's share of net assets of a foreign associate are translated into Ringgit Malaysia at the rate of exchange ruling at the balance sheet date. All exchange differences due to such currency translation are recognised in equity.

The principal exchange rate for every unit of foreign currency ruling at balance sheet date is as follows:

| | 2006 | 2005 |
|------------------|-------------|-------------|
| | RM | RM |
| Singapore Dollar | 2.362 | 2.214 |

(j) Impairment of Assets

At each balance sheet date, the Group reviews the carrying amounts of its assets to determine whether there is any indication of impairment. If any such indication exists, impairment is measured by comparing the carrying values of the assets with their recoverable amounts. Recoverable amount is the higher of net selling price and value in use, which is measured by reference to discounted future cash flows.

An impairment loss is recognised as an expense in the income statement immediately, unless the asset is carried at a revalued amount. Any impairment loss of a revalued asset is treated as a revaluation decrease to the extent of any unutilised previously recognised revaluation surplus for the same asset. Reversal of impairment losses recognised in prior years is recorded when the impairment losses recognised for the asset no longer exist or have decreased.

2. Significant Accounting Policies (Contd.)

(k) Income Tax

Income tax on the profit or loss for the year comprises current and deferred tax. Current tax is the expected amount of income taxes payable in respect of the taxable profit for the year and is measured using the tax rates that have been enacted at the balance sheet date.

Deferred tax is provided for, using the liability method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised. Deferred tax is not recognised if the temporary difference arises from goodwill or negative goodwill or from the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date. Deferred tax is recognised in the income statement, except when it arises from a transaction which is recognised directly in equity, in which case the deferred tax is also recognised directly in equity, or when it arises from a business combination that is an acquisition, in which case the deferred tax is included in the resulting goodwill or negative goodwill.

(l) Employee Benefits

(i) Short Term Benefits

Wages, salaries, bonuses, commission and social security contributions are recognised as an expense in the year in which the associated services are rendered by employees of the Group. Short term non-accumulating compensated absences are recognised when the absences occur.

(ii) Employee Share Option Scheme

The Chin Teck Plantations Berhad Employee Share Option Scheme, which lapsed on 30 January 2006, allowed the Group's employees to subscribe for ordinary shares of the Company. No compensation cost or obligation was recognised. When the options were exercised, equity was increased by the amount of the proceeds received.

(iii) Retirement Benefits

As required by law, companies in Malaysia make contributions to the state pension scheme, the Employees Provident Fund ("EPF"). Such contributions are recognised as an expense in the income statement as incurred.

In addition to the statutory obligations, the Group voluntarily provides retirement benefits covering eligible employees at rates determined by directors and such retirement benefits are recognised as an expense in the income statement as and when incurred

2. Significant Accounting Policies (Contd.)

(m) Revenue Recognition

Revenue is recognised when it is probable that economic benefits associated with the transaction will flow to the enterprise and the amount of the revenue can be measured reliably.

(i) Revenue – Sale of Goods

Revenue relating to sale of goods is recognised when delivery has taken place and the transfer of risks and rewards has been completed.

(ii) Other Operating Income

(a) Interest income

Interest income is recognised on a time proportion basis that reflects the effective yield on the asset.

(b) Dividend income

Dividend income is recognised when the right to receive payment is established.

(n) Financial Instruments

Financial instruments are recognised in the balance sheet when the Group has become a party to the contractual provisions of the instruments.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangements. Interest, dividends and gains and losses relating to a financial instrument classified as a liability, are reported as expense or income.

Distributions to holders of financial instruments classified as equity are recognised directly in equity. Financial instruments are offset when the Group has a legally enforceable right to offset and intends to settle either on a net basis or to realise the asset and settle the liability simultaneously.

(i) Non-Current Investments

Non-current investments other than investments in subsidiary, associates and jointly controlled entity are stated at cost less impairment losses. The policy for the recognition and measurement of impairment losses is in accordance with Note 2(j).

On disposal of an investment, the difference between net disposal proceeds and its carrying amount is recognised in the income statement. The gain arising from disposal of investments are thereafter transferred to capital reserve.

(ii) Trade and Other Receivables

Trade and other receivables are carried at anticipated realisable values. Bad debts are written off when identified. An estimate is made for doubtful debts based on a review of all outstanding amounts as at the balance sheet date.

For the purpose of calculating the diluted earnings per stock unit, the weighted average number of ordinary stock units has been adjusted for the effect of dilutive potential ordinary stock units from the exercise of options under the Employee Share Option Scheme.

The adjusted weighted average number of ordinary stock units is the weighted average number of ordinary stock units in issue during the financial year plus the weighted average number of ordinary stock units which would be issued on the exercise of the outstanding options under the Employee Share Option Scheme.

The Chin Teck Plantations Berhad Employee Share Option Scheme ("ESOS") was approved by the shareholders at the Extraordinary General Meeting held on 27 November 2000 and became effective on 31 January 2001. The new shares issued pursuant to the ESOS were immediately converted into new ordinary stock units of RM1.00 each in the Company upon allotment and issue. The ESOS lapsed on 30 January 2006.

The main features of the ESOS are as follows:

- (a) Eligible employees (including executive directors) of the Group must have been confirmed and have served at least twelve months in the employment of the Group on or prior to the date of the offer. At its discretion and at any time and from time to time as it deemed fit, the Option Committee, which was appointed by the Board of Directors, made an offer, to any eligible employee (including executive directors) whom the Option Committee selected at its discretion, to subscribe for new shares in the Company in accordance with the terms of the ESOS.
- (b) The maximum number of ordinary shares issued under the ESOS should not be more than 10% of the issued and paid-up share capital of the Company at any point of time during the existence of the ESOS, which was in force for a period of five years from 31 January 2001 to 30 January 2006.
- (c) The subscription price at which eligible employees (including executive directors) were entitled to exercise the option was the weighted average market price of the ordinary stock units as shown in the daily official list issued by Bursa Malaysia Securities Berhad for the five preceding market days immediately prior to the date of offer provided that:
 - (i) a discount, if any, of not more than 10% from the weighted average market price of the ordinary stock units for the five market days immediately preceding the date of offer was allowed; and
 - (ii) the price so determined should not be less than the par value of the ordinary stock units of RM1.00 each.
- (d) No offer should be made for less than 1,000 shares nor more than 500,000 shares to any eligible employee (including executive directors).
- (e) The number of shares under the ESOS or the subscription price or both, so far as the option remained unexercised, might be adjusted following any alteration in the capital structure of the Company by way of a capitalisation of profits or reserves, rights issue, reduction of capital, subdivision and/or consolidation of the Company's ordinary stock units.
- (f) The shares under the ESOS should remain unissued until the option was exercised and should upon allotment and issue rank pari passu in all respects with the existing ordinary stock units of the Company provided always that the shares so issued should not be entitled to any dividends, rights, allotments and/or distributions, the entitlement date of which preceded the relevant dates of the allotment of the aforesaid shares.

The persons to whom the options had been granted had no right to participate by virtue of the option in any share issue of any other company.

(c) Liquidity Risks

The Group has adequate cash including fixed deposits to meet its working capital requirements.

(d) Credit Risks

Credit risk, or the risk of counterparties defaulting, is controlled by the application of credit approvals, limits and monitoring procedures. Credit risks are minimised and monitored via strictly limiting the Group's association to business partners with high creditworthiness. Trade receivables are usually collected within the 30 days credit period and are monitored on an ongoing basis via Group management reporting procedures.

The Group does not have any significant exposure to any individual customer or counterparty nor does it have any major concentration or credit risk related to any financial instruments other than as disclosed in Note 16.

(e) Fair Values

The carrying amounts of financial assets and liabilities of the Group and of the Company at the balance sheet date approximated their fair values except for the following:

| | Group | | Company | |
|----------------------------|------------------------------------|---------------------------|------------------------------------|---------------------------|
| | Carrying Amounts RM | Fair Values RM | Carrying Amounts RM | Fair Values RM |
| Financial Assets | | | | |

| Unquoted investments | 1,583,220 | * | 1,583,220 | * |
| Amount due from subsidiary | - | - | 48,013,329 | ** |

* It is not practicable to estimate the fair value of the unquoted investment because of the lack of quoted market prices and the inability to estimate fair value without incurring excessive costs.

** It is not practicable to estimate the fair value of amount due from subsidiary due principally to lack of fixed repayment terms entered into by the parties concerned and without incurring excessive costs.

The following methods and assumptions are used to estimate the fair values of the following classes of financial instruments:

(i) Non-current Investments

The fair value of the quoted investments is determined by reference to stock exchange quoted market bid prices at the close of the business at the balance sheet date.

(ii) Trade receivables, other receivables, cash and bank balances, trade payables and other payables

The carrying values approximate their fair values due to the relatively short term maturity of these financial instruments.
