SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR THE FINANCIAL PERIOD ENDED 31 DECEMBER 2003

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements.

a Basis of preparation

The financial statements of the Group and the Company have been prepared under the historical cost convention, modified by the revaluation of certain leasehold land and buildings.

The financial statements comply with the applicable approved accounting standards in Malaysia and the provisions of the Companies Act, 1965. The new applicable approved accounting standards adopted in these financial statements are as follows:

a. New standards applicable for the financial period:

Prospective application

- i. MASB 23 "Impairment of Assets"
- ii. MASB 24 "Financial Instruments: Disclosure and Presentation"

Retrospective application

- i. MASB 22 "Segment Reporting"
- ii. MASB 25 "Income Taxes"

b. Early adoption of accounting standard applicable only in the next financial year:

Retrospective application

- i. MASB 29 "Employee Benefits"

With the exception of the adoption of MASB 25 and MASB 29 (see Note 42), there are no other changes in accounting policy that affect net profit/(loss) for the financial period or shareholders' funds.

Comparative figures have been adjusted or extended to conform to changes in presentation due to the requirements of MASB 22.

Comparatives are not disclosed upon first application of MASB 24, as permitted by the Standard.

The preparation of financial statements in conformity with the applicable approved accounting standards in Malaysia and the provisions of the Companies Act, 1965 requires the Directors to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported financial period. Actual results could differ from those estimates.

b Basis of consolidation

The consolidated financial statements include the financial statements of the Company and all its subsidiaries made up to the end of the financial period. Subsidiaries are those companies in which the Group has power to exercise control over the financial and operating policies so as to obtain benefits from their activities. Subsidiaries are consolidated from the date on which control is transferred to the Group and are no longer consolidated from the date that control ceases. Subsidiaries are consolidated using the acquisition method of accounting, except where the acquisition of subsidiaries meets the criteria to use the merger method of accounting.

Under the merger method of accounting, the results of the subsidiaries are presented as if the merger had been effected throughout the current and previous financial periods. The cost of investment in a merger is recorded at the aggregate of the nominal value of equity shares issued, cash and cash equivalents and fair value of other consideration. On consolidation, the difference between the carrying value of the investment over the nominal value of the shares acquired is taken to a non-distributable merger reserve or merger deficit.

Under the acquisition method of accounting, the results of subsidiaries acquired or disposed of during the financial period are included from the date of acquisition up to the date of disposal. The cost of an acquisition is the amount of cash paid and the fair value at the date of acquisition of other purchase consideration. At the date of acquisition, the fair values of the subsidiaries' net assets are determined and these values are reflected in the consolidated financial statements. The difference between the cost of acquisition over the Group's share of the fair value of the identifiable net assets of the subsidiaries acquired at the date of acquisition is reflected as goodwill or negative goodwill.

Intra-group transactions, balances and unrealised gains on transactions are eliminated. Unrealised losses are also eliminated unless cost cannot be recovered. Where necessary, adjustments are made to the financial statements of subsidiaries to ensure consistency of accounting policies with those of the Group.

Minority interest is measured at the minorities' share of the post acquisition fair values of the identifiable assets and liabilities of the acquiree. Separate disclosure is made of minority interest.

The gain or loss on disposal of a subsidiary is the difference between net disposal proceeds and the Group's share of its net assets and exchange differences which were not previously recognised in the consolidated income statement.

c Associates

Associates are companies in which the Group exercises significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the associates but not control over those policies.

Investments in associates are accounted for in the consolidated financial statements by the equity method of accounting.

Equity accounting involves recognising in the income statement, the Group's share of the results of associates for the financial period. The Group's investments in associates are carried in the balance sheet at an amount that reflects its share of the net assets of the associates. Equity accounting is discontinued when the carrying amount of the investment in an associate reaches zero, unless the Group has incurred obligations or guaranteed obligations in respect of the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. Where necessary, in applying the equity method, adjustments are made to the financial statements of associates to ensure consistency of accounting policies with those of the Group.

d Goodwill

Goodwill represents the excess of the cost of acquisition of subsidiaries or associates acquired over the Group's share of the fair values of their separable net assets at the date of acquisition.

Goodwill is written off against the Group's revenue reserve.

e Investments

Investments in subsidiaries and associates are stated at cost. Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount. See accounting policy Note (i) on impairment of assets.

Investments in other non-current investments are stated at cost and an allowance for diminution in value is made where, in the opinion of the Directors, there is a decline other than temporary in the value of such investments. Where there has been such a decline, this is recognised as an expense in the financial period in which the decline is identified.

Short-term investments are carried at the lower of cost and market value.

On disposal of an investment, the difference between the net disposal proceeds and its carrying amount is charged/credited to the income statement.

f Property, plant and equipment

Property, plant and equipment are stated at cost or valuation less accumulated depreciation and accumulated impairment losses. See accounting policy Note (i) on impairment of assets.

The Directors have applied the transitional provisions of International Accounting Standard ("IAS") 16 "Property, Plant and Equipment", which has been adopted by MASB, which allows properties previously revalued to continue to be stated at their valuation amounts less accumulated depreciation. Accordingly, certain leasehold land and buildings of the Group are stated at valuation amounts carried out in 1996, which have not been updated.

Freehold land is not amortised as it is deemed to have an infinite life. Long term leasehold land is amortised in equal instalments over the respective lease periods, ranging between 50 and 90 years.

Assets under construction are depreciated when the assets are ready for their intended use.

Depreciation on the other property, plant and equipment is calculated so as to write off the cost or valuation of the assets on a straight line basis over the expected useful lives of the assets concerned. The annual rates are:

	%
Buildings	2 - 5
Plant and machinery	20 - 25
Cinema	2 - 5
Broadcasting and transmission equipment	2.9 - 33.3
Production equipment	10 - 20
Office equipment, furniture and fittings	10 - 33.3
Office renovations	33.3
Motor vehicles	20
Leasehold improvements	6.7 - 33.3

g Intangible assets - Programmes and film rights

Programmes and film rights are stated at cost less amortisation and impairment losses, if any. See accounting policy Note (i) on impairment of assets.

The programmes and film rights are recognised after they are contracted for and upon receipt of materials. Cost comprises contracted cost and direct expenditure. Amortisation is calculated so as to write off the relevant portion of the cost of programmes and film rights which fairly represents its relevant attached rights, to match against recognised revenue from these programmes and film rights. The amortisation rates are:

Purchases with full rights/limited rights (2 runs or more)

	%
--	---

Dramas and movies

Upon first transmission	60
Upon second transmission	40

Series and comedies

Upon first transmission	100
-------------------------	-----

Purchases with limited rights (1 run) and in-house programmes

Upon first transmission	100
-------------------------	-----

h Prepaid expenditure

Prepaid expenditure is in respect of prepaid lease rentals for transmission stations, which are charged to the income statement on a straight line basis over the respective period of the leases, ranging between 31 and 36 years.

i Impairment of assets

Property, plant and equipment and other non-current assets, including intangible assets, are reviewed for impairment losses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount. The recoverable amount is the higher of an asset's net selling price and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there is separately identifiable cash flows.

The impairment loss is charged to the income statement unless it reverses a previous revaluation in which case it is charged to the revaluation surplus. Any subsequent increase in recoverable amount is recognised in the income statement unless it reverses an impairment loss on a revalued asset, in which case it is taken to revaluation surplus.

j Trade receivables

Trade receivables are carried at anticipated realisable value. Bad debts are written off in the financial period in which they are identified. An estimate is made for doubtful debts based on a review of all outstanding amounts at the financial period end.

k Inventories*Consumable spares*

Consumable spares comprise spare parts for broadcasting and transmission equipment and are expensed off upon utilisation.

Other inventories

Other inventories comprising mainly musical albums and trading inventories are stated at the lower of cost and net realisable value, and are determined on a weighted average basis. Net realisable value is the estimated selling price in the ordinary course of business, less the costs of completion and selling expenses.

l Cash and cash equivalents

For the purpose of the cash flow statements, cash and cash equivalents comprise cash in hand, bank balances, demand deposits, bank overdrafts and short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

m Leases**Finance leases**

Leases of property, plant and equipment where the Group assumes substantially all the benefits and risks of ownership are classified as finance leases.

Finance leases are capitalised at the estimated present value of the underlying lease payments at the date of inception. Each lease payment is allocated between the liability and finance charges so as to achieve a periodic constant rate of interest on the balance outstanding. The corresponding rental obligations, net of finance charges, are included in payables. The interest element of the finance charge is charged to the income statement over the lease period.

Property, plant and equipment acquired under finance lease contracts are depreciated over the estimated useful life of the asset. Where there is no reasonable certainty that the ownership will be transferred to the Group, the asset is depreciated over the shorter of the lease term and its useful life.

Operating leases

Leases of assets where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the income statement on a straight line basis over the period of the lease.

n Income taxes

Current tax expense is determined according to the tax laws of each jurisdiction in which the Group operates and include all taxes based upon the taxable profits, including withholding taxes payable by a foreign subsidiary or associate on distributions of retained earnings to companies in the Group, and real property gains taxes payable on disposal of properties.

Deferred tax is provided for, using the liability method, on temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which the deductible temporary differences or unused tax losses can be utilised.

Deferred tax is not recognised if the temporary differences arise from goodwill or negative goodwill or from the initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit.

Deferred tax is recognised on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date.

Deferred tax is recognised in the income statement, except when it arises from a transaction which is recognised directly in equity, in which case the deferred tax is also charged or credited directly to equity, or when it arises from a business combination that is an acquisition, in which case the deferred tax is included in the resulting goodwill or negative goodwill.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset and the Group intends to settle either on a net basis or to realise the asset and settle the liability simultaneously.

o Employee benefits

i. Short-term employee benefits

Wages, salaries, sick leave, bonuses and non-monetary employee benefits are accrued in the financial period in which the associated services are rendered by employees of the Group.

ii. Post-employment benefits - Defined contribution plans

The Group's contributions to defined contribution plans, including the national defined contribution plan, the Employees' Provident Fund ("EPF"), are charged to the income statement in the period to which they relate. Once the contributions have been paid, the Group has no further payment obligations.

p Foreign currencies

Transactions in foreign currencies are translated into Ringgit Malaysia at the rates of exchange ruling at the transaction dates or at contracted rates, where applicable. At balance sheet date, monetary assets and liabilities resulting from foreign currency transactions are translated into Ringgit Malaysia at rates of exchange ruling at that date or at contracted rates, where applicable. Exchange differences are dealt with through the income statement.

In the Group financial statements, assets and liabilities and results of operations of foreign subsidiaries are translated into Ringgit Malaysia at the rates of exchange ruling at the balance sheet date. Exchange differences on translation are dealt with through the exchange fluctuation reserve. Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the Group and are translated at the exchange rate ruling at the date of the transaction.

The principal closing rates used in the translation of foreign currency amounts are as follows:

Foreign currency	31.12.2003	31.8.2002
	RM	RM
1 US Dollar (USD)	3.800	3.800
1 Singapore Dollar (S\$)	2.209	2.191
1 Brunei Dollar (B\$)	2.209	2.191
1 Pound Sterling (GBP)	6.688	5.885
100 Cedi	0.058	0.047

q Income recognition

Revenue of the Company is recognised on an accrual basis based on the prevailing interest rates for deposits at financial institutions and fixed rates for advances to subsidiaries respectively.

Revenue of the subsidiaries are recognised upon the delivery of products and customer acceptance or performance of services, or upon telecast of advertisements, net of discounts, sales commissions and sales rebates, if any.

Dividend income is recognised when the right to receive payment is established.

Interest income is recognised on an accrual basis based on the prevailing interest rates.

r Contingent liabilities

The Group does not recognise a contingent liability but discloses its existence in the financial statements. A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by uncertain future events beyond the control of the Group or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in the extremely rare circumstance where there is a liability that cannot be recognised because it cannot be measured reliably.

s Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, when it is probable that an outflow of resources will be required to settle the obligation, and when a reliable estimate of the amount can be made. Where the Group expects a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

t Debt instruments

The debt instruments issued by the Group and the Company are as follows:

- i. Irredeemable convertible unsecured loan stocks
- ii. Redeemable unsecured loan stocks
- iii. Bonds
- iv. Warrants

The carrying value of debt instruments issued by the Group and the Company is the nominal value of the debt instruments less the unamortised discount or plus the unamortised premium on issuance, if any. The discount or premium on issuance is amortised to the income statement on a yield to date basis over the duration of the debt instruments. Coupon payments arising from the debt instruments are charged to the income statement on an accrual basis.

The Group has taken advantage of the transitional provisions provided in MASB 24 "Financial Instruments: Disclosure and Presentation" in respect of the classification of compound financial instruments. Accordingly, the irredeemable convertible unsecured loan stocks ("ICULS") issued by the Company have been classified as liabilities.

Warrants have been disclosed as part of the other reserves at a carrying value based on its issue price upon issuance.

u Segmental reporting

Segment reporting is presented for enhanced assessment of the Group's risks and returns. Business segments provide products or services that are subject to risk and returns that are different from those of other business segments. Geographical segments provide products or services within a particular economic environment that is subject to risks and returns that are different from those components operating in other economic environments.

Segment revenue, expense, assets and liabilities are those amounts resulting from the operating activities of a segment that are directly attributable to the segment and the relevant portion that can be allocated on a reasonable basis to the segment. Segment revenue, expense, assets and liabilities are determined before intragroup balances, and intragroup transactions are eliminated as part of the consolidation process, except to the extent that such intragroup balances and transactions are between group enterprises within a single segment.

v Financial instruments

i. Description

A financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise.

A financial asset is any asset that is cash, a contractual right to receive cash or another financial asset from another enterprise, a contractual right to exchange financial instruments with another enterprise under conditions that are potentially favourable, or an equity instrument of another enterprise.

A financial liability is any liability that is a contractual obligation to deliver cash or another financial asset to another enterprise, or to exchange financial instruments with another enterprise under conditions that are potentially unfavourable.

ii. Financial instruments recognised on the balance sheet

The particular recognition method adopted for financial instruments recognised on the balance sheets is disclosed in the individual accounting policy note associated with each item.

iii. Fair value estimation for disclosure purposes

The fair value of publicly traded securities is based on quoted market prices at the balance sheet date.

In assessing the fair values of financial instruments, the Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for the specific or similar instruments are used for long term debt. Other techniques and bases, such as discounted value of future cash flows and the underlying net asset base of the instrument, are used to determine fair values for the remaining financial instruments. In particular, the fair value of financial liabilities is estimated by discounting the future contractual cash flows at the current market interest rate available to the Group for similar financial instruments.

The carrying values of financial assets and financial liabilities with a maturity period of less than one year are assumed to approximate their fair values.

9 Earnings/(loss) per share (continued)

b. Diluted earnings per share

For the diluted earnings per share calculation, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares. The Company has two categories of dilutive potential ordinary shares, irredeemable convertible unsecured loan stocks ("ICULS") and warrants.

The irredeemable convertible unsecured loan stocks is assumed to have been converted into ordinary shares and net profit/(loss) for the financial period/year is adjusted to eliminate the applicable interest expense less the associated tax effect.

In the diluted earnings per share calculation in respect of warrants, a calculation is done to determine the number of shares that could have been acquired at market price (determined as the average annual share price of the Company's shares) based on the monetary value of the subscription rights attached to outstanding warrants. This calculation serves to determine the "bonus" element to the ordinary shares outstanding for the purpose of computing the dilution. No adjustment is made to net profit/(loss) for the financial period for the warrants calculation.

41 Fair value of financial instruments for disclosure purposes

The fair value of a financial instrument is assumed to be the amount at which the instrument could be exchanged or settled between knowledgeable and willing parties in an arm's length transaction.

Quoted market prices, when available, are used as a measure of fair values. However, for a significant portion of the Group's and Company's financial instruments, quoted market prices do not exist. For such financial instruments,

fair values presented are estimates derived using the net present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and judgements made regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows and other factors. Changes in assumptions could significantly affect these estimates and the resulting fair values.

41 Fair value of financial instruments for disclosure purposes (continued)

The carrying values of financial assets and financial liabilities of the Group at the balance sheet date approximated their fair values, except as set out below:

	Carrying amount RM'000	Fair value RM'000
At 31 December 2003		
Investments		
– Quoted shares	121	126
– Quoted property and unit trusts	2,308	2,333
– Unquoted investments	206	*
Irredeemable convertible unsecured loan stocks ("ICULS")	180,000	135,000
Bonds	90,124	118,498
Warrants	11,500	93,150
Redeemable unsecured loan stocks ("RULS")	88,634	84,024
Term loans (secured)	20,000	16,828
Hire-purchase and lease creditors	5,211	4,757

* It is not practicable to estimate the fair value of the Group's unquoted investments because of the lack of reference market prices and the inability to estimate fair value without incurring excessive costs. However, the carrying amounts recorded are not anticipated to differ significantly from their fair values at the balance sheet date.

42 Changes in accounting policies

During the financial period, the Group adopted certain new MASB standards as mentioned in the summary of significant accounting policies. As a result, the Group has changed certain accounting policies to comply with the new MASB standards. With the exception of the adoption of MASB 25 "Income Taxes" and MASB 29 "Employee Benefits", there are no other changes in accounting policy that affect net profit from ordinary activities after taxation or shareholders' funds. However, certain comparatives have been adjusted or extended to take into account the requirements of the new MASB Standards.

a. Deferred tax

In previous years, deferred tax was recognised for timing differences except when there was reasonable evidence that such timing differences would not reverse in the foreseeable future. The tax effect of timing differences that resulted in a debit balance or a debit to the deferred tax balance was not carried forward unless there was a reasonable expectation of its realisation.

The potential tax savings relating to a tax loss carried forward was only recognised if there was assurance beyond any reasonable doubt that future taxable income would be sufficient for the benefit of the loss to be realised.

The Group has now changed its accounting policy to recognise deferred tax on temporary differences arising between the amounts attributable to assets and liabilities for tax purposes and their carrying values in the financial statements. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences or unused tax losses can be utilised.

In addition, deferred tax is recognised on temporary differences arising on investments in subsidiaries and associates except where the timing of the reversal of the temporary differences will not reverse in the foreseeable future.

This change in accounting policy has been accounted for retrospectively.

b. Short-term employee benefits

The Group has adopted a new accounting policy to recognise unutilised employees' annual leave as at the financial period end, which has been accounted for retrospectively.

42 Changes in accounting policies (continued)

The effects of the changes in accounting policies and merger accounting on the Group's financial statements are as follows:

43 Financial risk management

The Group's activities expose it to a variety of financial risks, including:

- a. foreign currency exchange risk – risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates
- b. interest rate risk – risk that the value of a financial instrument will fluctuate due to changes in market interest rates
- c. cash flow risk – risk that future cash flows associated with a financial instrument will fluctuate. In the case of a floating rate debt instrument, such fluctuations result in a change in the effective interest rate of the financial instrument, usually without a corresponding change in its fair value
- d. market risk – risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market
- e. credit risk – risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss
- f. liquidity risk (funding risk) – risk that an enterprise will encounter difficulty in raising funds to meet commitments associated with financial instruments

The Group's overall financial risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. Financial risk management is carried out through risk reviews, internal control systems and adherence to the Group's financial risk management policies. The Board regularly reviews these risks and approves the treasury policies, which covers the management of these risks.

a. Foreign currency exchange risk

The Group operates internationally and is exposed to currency risk as a result of the foreign currency transactions entered into with companies in currencies other than their functional currency.

The exposure of the Group to currency fluctuations of Ringgit Malaysia to the US Dollar is minimal as long as Ringgit Malaysia continues to be pegged against that currency. In respect of other currency exposures, the Group does not enter into any hedging contracts to limit its exposure on foreign currency receivables and payables, and on cash flows generated from anticipated transactions denominated in foreign currencies.

b. Interest rate risk

The Group's income and operating cash flows are substantially independent of changes in market interest rates. Interest rate exposure arises from the Group's borrowings and deposits, and is managed through the use of fixed and floating rate debt.

c. Market risk

For key product purchases, the Group establishes floating and fixed priced levels that the Group considers acceptable and enters into physical supply agreements, where necessary, to achieve these levels.

d. Credit risk

Credit risk arises when sales are made on deferred credit terms. The Group seeks to invest cash assets safely and profitably. It also seeks to control credit risk by setting counterparty limits and ensuring that sales of products and services are made to customers with an appropriate credit history. The Group considers the risk of material loss in the event of non-performance by a financial counterparty to be unlikely.

The Group has no significant concentrations of credit risk except that the majority of its deposits are placed with major financial institutions in Malaysia.

The Group trades with a large number of customers who are nationally and internationally dispersed but within the industry in which the Group operates its principal activities as disclosed in Note 2. Due to these factors, management believes that no additional credit risk beyond amounts allowed for collection losses is inherent in the Group's trade receivables.

43 Financial risk management (continued)

e. Liquidity risk

The Group manages its debt maturity profile, operating cash flows and availability of funding so as to ensure that all repayment and funding requirements are met. As part of its overall prudent liquidity management, the Group maintains sufficient levels of cash or cash convertible investments to meet its working capital requirements. Due to the dynamic nature of the underlying business, the Group aims at maintaining flexibility in funding by keeping committed credit lines available.

44 Comparative figures

The comparative figures in the consolidated financial statements have been adjusted to reflect the use of the merger method of accounting for the acquisition of Sistem Televisyen Malaysia Berhad ("STMB").

 - i. the matters required by Section 169 of the Companies Act, 1965 to be dealt with in the financial statements; and
 - ii. the state of affairs of the Group and of the Company as at 31 December 2003 and of the results and cash flows of the Group and of the Company for the financial period ended on that date; and
- b. the accounting and other records and the registers required by the Act to be kept by the Company and by the subsidiaries of which we have acted as auditors have been properly kept in accordance with the provisions of the Act.

We have considered the financial statements and the auditors' reports of the subsidiaries of which we have not acted as auditors, which are indicated in Note 22 to the financial statements.

We are satisfied that the financial statements of the subsidiaries that have been consolidated with the Company's financial statements are in form and content appropriate and proper for the purposes of the preparation of the consolidated financial statements and we have received satisfactory information and explanations required by us for those purposes.

RINGKASAN DASAR-DASAR PERAKAUNAN UTAMA BAGI TEMPOH KEWANGAN BERAKHIR 31 DISEMBER 2003

Dasar-dasar perakaunan berikut telah digunakan secara seragam di dalam menangani perkara-perkara yang dianggap penting yang berkaitan dengan penyata kewangan.

a Asas penyediaan

Penyata kewangan Kumpulan dan Syarikat telah disediakan berdasarkan konvensyen kos silam, diubahsuai melalui penilaian semula tanah pegang pajak dan bangunan-bangunan tertentu.

Penyata kewangan ini mematuhi piawaian perakaunan yang berkaitan yang diluluskan di Malaysia dan peruntukan-peruntukan di bawah Akta Syarikat, 1965. Pendekatan baru piawaian perakaunan yang berkaitan yang diluluskan di dalam penyata kewangan adalah seperti berikut:-

- a. Piawaian baru yang digunakan semasa tempoh kewangan:

Pendekatan prospektif

- i. Lembaga Piawaian Perakaunan Malaysia No. 23 "Kemerosotan Aset"
- ii. Lembaga Piawaian Perakaunan Malaysia No. 24 "Instrumen Kewangan: Pendedahan dan Peragaan"

Pendekatan retrospektif

- i. Lembaga Piawaian Perakaunan Malaysia No. 22 "Analisa Segmen"
- ii. Lembaga Piawaian Perakaunan Malaysia No. 25 "Cukai-cukai Pendapatan"

- b. Pendekatan awal piawaian perakaunan yang berkaitan sahaja pada tahun kewangan akan datang:

Pendekatan retrospektif

- i. Lembaga Piawaian Perakaunan Malaysia No. 29 "Faedah-faedah pekerja"

Selain daripada penggunaan Lembaga Piawaian Perakaunan Malaysia No. 25 dan Lembaga Piawaian Perakaunan Malaysia No. 29 (lihat Nota 42), tiada sebarang perubahan di dalam dasar perakaunan yang melibatkan keuntungan/(kerugian) bersih di sepanjang tempoh kewangan atau ekuiti pemegang-pemegang saham.

Angka-angka perbandingan telahpun diubahsuai atau dibentangkan mengikut perubahan-perubahan di dalam peragaan selaras dengan kehendak-kehendak Lembaga Piawaian Perakaunan Malaysia No. 22.

Pendekatan ulung Lembaga Piawaian Perakaunan Malaysia No. 24 membolehkan perbandingan tidak didedahkan sebagaimana yang dibenarkan oleh Piawaian.

Penyediaan penyata kewangan ini adalah selaras dengan piawaian perakaunan yang berkaitan yang diluluskan di Malaysia dan peruntukan-peruntukan Akta Syarikat, 1965 yang memerlukan Jemaah Pengarah membuat anggaran dan tanggapan yang memberi kesan kepada jumlah aset-aset dan liabiliti-liabiliti yang dilaporkan dan pendedahan aset dan liabiliti luar jangka pada tarikh penyata kewangan dan jumlah pendapatan dan perbelanjaan yang dilaporkan sepanjang tempoh kewangan ini. Keputusan sebenar mungkin berbeza daripada apa yang telah dianggarkan.

b Asas penyataan

Penyata kewangan yang disatukan termasuk penyata kewangan Syarikat dan kesemua anak-anak syarikat sehingga akhir tempoh kewangan. Anak-anak syarikat adalah syarikat di mana Kumpulan mempunyai kuasa untuk mengawal dasar-dasar kewangan dan operasi supaya mendapat faedah daripada operasi tersebut. Anak-anak syarikat disatukan bermula daripada tarikh kawalan berpindah kepada Kumpulan dan tidak lagi disatukan mulai daripada tarikh kawalan luput. Anak-anak syarikat disatukan dengan menggunakan kaedah perakaunan perolehan kecuali di mana perolehan anak-anak syarikat memenuhi syarat-syarat untuk menggunakan kaedah perakaunan penggabungan.

Mengikut kaedah perakaunan penggabungan, keputusan-keputusan anak-anak syarikat diperagakan seolah-olah penggabungan telahpun berlaku sepanjang tempoh kewangan semasa dan yang lalu. Kos pelaburan di dalam penggabungan direkod pada aggregat nilai nominal saham ekuiti yang diterbitkan, tunai dan bersamaan tunai serta nilai-nilai saksama lain-lain pertimbangan. Pada tahap penyatuan, perbezaan di antara nilai yang dibawa oleh pelaburan ke atas nilai nominal saham-saham yang diperolehi dibawa kepada rezab penggabungan atau defisit penggabungan yang tidak boleh diagihkan.

Mengikut kaedah perakaunan perolehan, keputusan anak-anak syarikat yang dibeli atau dijual semasa tempoh kewangan adalah dimasukkan bermula daripada tarikh pembelian sehingga tarikh penjualannya. Kos pembelian adalah jumlah yang dibayar dan nilai saksama pada tarikh pembelian lain-lain pertimbangan. Pada tarikh pembelian, nilai saksama aset-aset bersih anak-anak syarikat ditentukan dan nilai-nilai ini akan digambarkan di dalam penyata kewangan yang disatukan. Perbezaan di antara kos pembelian ke atas bahagian nilai saksama aset-aset bersih yang boleh dikenalpasti anak-anak syarikat Kumpulan yang dibeli pada tarikh pembelian digambarkan sebagai muhibbah atau muhibbah negatif.

Urusniaga-urusniaga di antara Kumpulan, baki-baki dan keuntungan yang belum direalisasikan adalah dihapuskan. Kerugian yang belum direalisasikan juga turut dihapuskan melainkan sekiranya kos tidak dapat diperolehi semula. Di mana perlu, penyelarasan dibuat kepada penyata kewangan anak-anak syarikat bagi memastikan kesamaan dasar-dasar perakaunan seperti yang diamalkan oleh Kumpulan.

Kepentingan minoriti dikira sebagai nilai saksama saham milik minoriti selepas pengambilalihan aset-aset atau liabiliti-liabiliti pengambilalih. Pendedahan berasingan juga dibuat bagi kepentingan minoriti.

Keuntungan atau kerugian dari penjualan anak syarikat adalah perbezaan di antara jualan kutipan bersih dan bahagian aset bersih Kumpulan dan perubahan pertukaran matawang yang belum diambilkira di dalam penyata kewangan yang disatukan sebelum ini.

c Syarikat-syarikat bersekutu

Syarikat bersekutu adalah syarikat-syarikat di mana Kumpulan mempunyai pengaruh yang penting. Pengaruh penting adalah kuasa untuk mengambil bahagian di dalam keputusan-keputusan dasar operasi dan kewangan syarikat bersekutu tetapi tidak mempunyai kuasa ke atas dasar-dasar tersebut.

Pelaburan di dalam syarikat-syarikat bersekutu diiktiraf di dalam penyata kewangan yang disatukan dengan kaedah perakaunan ekuiti.

Perakaunan ekuiti melibatkan pengiktirafan keputusan bahagian Kumpulan di dalam syarikat bersekutu di dalam penyata kewangan bagi tempoh kewangan tersebut. Pelaburan Kumpulan di dalam syarikat-syarikat bersekutu dibawa ke dalam kunci kira-kira pada jumlah yang menggambarkan bahagiannya ke atas aset bersih syarikat-syarikat bersekutu. Perakaunan ekuiti dihentikan apabila jumlah pelaburan yang dibawa di dalam syarikat bersekutu mencapai nilai sifar, melaninkan Kumpulan menanggung kewajipan atau jaminan terhadap syarikat bersekutu.

Urusniaga-urusniaga keuntungan yang tidak direalisasi di antara Kumpulan dan syarikat-syarikat bersekutu dihapuskan sehingga Kumpulan mencapai tahap kepentingan di dalam syarikat bersekutu. Kerugian yang belum direalisasi juga turut dihapuskan kecuali jika urusniaga itu dapat membuktikan terdapat kemerosotan pada aset yang dipindahmilik. Di mana perlu, di dalam menggunakan kaedah ekuiti, penyata kewangan syarikat-syarikat bersekutu telah diubahsuai supaya konsisten dengan dasar-dasar perakaunan Kumpulan.

d Muhibbah

Muhibbah mewakili lebihan kos pembelian anak-anak syarikat atau syarikat-syarikat bersekutu yang diambilalih ke atas bahagian nilai saksama aset-aset bersih Kumpulan yang diasangkan pada tarikh pengambilalihan.

Muhibbah dihapuskan daripada rezab Kumpulan.

e Pelaburan

Pelaburan di dalam anak-anak syarikat dan syarikat-syarikat bersekutu dinyatakan pada kos. Apabila terdapat tanda-tanda kemerosotan, nilai yang dibawa oleh pelaburan dinilai dan dilupuskan serta merta ke jumlah yang boleh didapatkan semula. Sila rujuk dasar perakaunan Nota (i) berkaitan kemerosotan aset-aset.

Pelaburan di dalam lain-lain pelaburan semasa dinyatakan pada kos dan peruntukan untuk penyusutan nilai telah pun dibuat di mana pada pendapat Jemaah Pengarah, telah terdapat penyusutan nilai dalam pelaburan. Penyusutan ini telah digambarkan sebagai perbelanjaan dalam tempoh kewangan di mana penyusutan tersebut telah dikenalpasti.

Pelaburan jangka pendek adalah dibawa pada kadar lebih rendah daripada kos dan nilai pasaran.

Semasa penjualan suatu pelaburan, perbezaan di antara jualan kutipan bersih dan jumlah dibawanya dicaj/ dikredit kepada penyata pendapatan.

f Hartanah, loji dan peralatan

Hartanah, loji dan peralatan dinyatakan pada kos atau penilaian setelah ditolak susutnilai terkumpul dan kerugian kemerosotan terkumpul. Sila rujuk dasar perakaunan Nota (i) berkaitan kemerosotan aset-aset.

Sewajarnya, sesetengah bangunan dan tanah pegang pajak milik Kumpulan diambilkira mengikut jumlah yang dinilaikan pada 1996, yang masih belum dikemaskini.

Tanah milik bebas tidak dilunaskan kerana ianya dianggap mempunyai jangka hayat yang berkekalan. Tanah pegang pajak jangka panjang dilunaskan pada ansuran yang sama banyak sepanjang jangka hayat pajakan masing-masing di antara 50 dan 90 tahun.

9 Keuntungan/ (kerugian) sesaham (sambungan)

b. Keuntungan/(kerugian) sesaham – dicairkan

Bagi pengiraan keuntungan sesaham dicairkan, purata wajaran saham-saham biasa yang diterbitkan dianggap sebagai penukaran bagi semua saham biasa berpotensi kecairan. Syarikat mempunyai dua kategori saham-saham biasa berpotensi kecairan, saham pinjaman tidak bercagar tidak boleh ditebus dan boleh ditukar (“ICULS”) dan waran.

Saham pinjaman tidak bercagar tidak boleh ditebus dan boleh ditukar adalah dianggap telah di tukar kepada saham biasa dan keuntungan/(kerugian) bersih bagi tahun/tempoh kewangan dan dilaraskan untuk mengeluarkan perbelanjaan faedah tolak kesan cukai berkaitan.

Bagi waran-waran, pengiraan keuntungan sesaham yang dicairkan ditentukan oleh jumlah saham-saham yang mungkin dapat diperolehi pada harga pasaran (ditentukan sebagai purata harga saham tahunan syarikat) berdasarkan nilai kewangan hak-hak sumbangan yang disertai waran-waran yang tertunggak. Pengiraan-pengiraan ini dapat menentukan elemen bonus pada saham biasa yang tertunggak bagi tujuan pengiraan pencairan. Tiada apa-apa perubahan dibuat pada keuntungan/(kerugian) bersih pada tempoh kewangan bagi pengiraan waran-waran ini.

41 Nilai saksama instrumen-instrumen kewangan bagi tujuan peragaan

Nilai saksama instrumen kewangan dianggap amaun di mana instrumen tersebut boleh ditukar atau dibayar di antara pihak-pihak yang berpengetahuan dan bersedia dalam suatu urusniaga yang sepadan.

Harga-harga pasaran yang disenaraikan, di mana ada, digunakan sebagai ukuran nilai-nilai saksama. Walaubagaimanapun, pada sebahagian besar instrumen-instrumen kewangan Kumpulan dan Syarikat, tidak wujud harga-harga pasaran yang disenaraikan. Bagi instrumen-instrumen kewangan yang

sedemikian, nilai-nilai saksama yang diperagakan adalah anggaran yang menggunakan nilai bersih semasa atau lain-lain teknik penilaian. Teknik-teknik ini membabitkan ketidaktentuan dan sangat dipengaruhi oleh andaian-andaian yang digunakan dan pertimbangan-pertimbangan yang dibuat berkenaan ciri-ciri risiko beberapa instrumen-instrumen kewangan keadah-kaedah diskaun, anggaran aliran tunai akan datang dan lain-lain faktor. Sebarang perubahan di dalam andaian akan mempengaruhi anggaran-anggaran ini dan nilai-nilai saksama yang diputuskan.

41 Nilai saksama instrumen-instrumen kewangan bagi tujuan peragaan (sambungan)

Nilai-nilai yang dibawa pada aset-aset dan liabiliti-liabiliti kewangan Kumpulan pada tarikh kunci kira-kira hampir kepada nilai-nilai saksama kecuali yang dilampirkan di bawah:

	Jumlah yang dibawa RM'000	Nilai saksama RM'000
Pada 31 Disember 2003		
Pelaburan		
– Saham-saham yang disenaraikan	121	126
– Hartanah dan unit amanah yang disenaraikan	2,308	2,333
– Pelaburan yang tidak disenaraikan	206	*
Saham pinjaman tidak bercagar boleh ditukarkan tidak boleh tebus ("ICULS")	180,000	135,000
Bon	90,124	118,498
Waran	11,500	93,150
Saham pinjaman tidak bercagar boleh tebus ("RULS")	88,634	84,024
Pinjaman berpenggal	20,000	16,828
Sipiutang sewa beli dan pajakan	5,211	4,757

* Adalah tidak praktik membuat anggaran ke atas nilai saksama pelaburan Kumpulan yang tidak disenaraikan kerana kekurangan rujukan harga pasaran dan ketidakmampuan untuk menganggar nilai saksama tanpa melibatkan kos yang melampau. Walaubagaimanapun, nilai-nilai yang dibawa dalam rekod tidak dianggap berlainan daripada nilai-nilai saksama mereka pada tarikh kunci kira-kira.

42 Perubahan dalam dasar-dasar perakaunan

Sepanjang tempoh kewangan, Kumpulan telah mengambilkira beberapa piawaian baru Lembaga Piawaian Perakaunan Malaysia sebagaimana yang telah disebutkan di dalam ringkasan dasar-dasar perakaunan utama.

Hasilnya, Kumpulan telah mengubah beberapa dasar perakaunannya yang tertentu menurut piawaian-piawaian baru Lembaga Piawaian Perakaunan Malaysia. Selain daripada penggunaan Lembaga Piawaian Perakaunan Malaysia No. 25 "Cukai-cukai Pendapatan" dan Lembaga Piawaian Perakaunan Malaysia No. 29 "Faedah-faedah pekerja", tiada sebarang perubahan di dalam dasar perakaunan yang melibatkan keuntungan bersih daripada aktiviti-aktiviti biasa selepas cukai atau dana pemegang-pemegang saham. Walaubagaimanapun, beberapa perbandingan telah disesuaikan bagi mengambilkira kehendak-kehendak piawaian-piawaian baru Lembaga Piawaian Perakaunan Malaysia.

a. Cukai tertunda

Pada tahun-tahun yang lepas, cukai tertunda telah diiktiraf berdasarkan kepada perbezaan pengaturan masa kecuali apabila terdapat bukti munasabah bahawa perbezaan pengaturan masa tersebut tidak akan berubah di masa akan datang. Kesan cukai ke atas perbezaan pengaturan masa yang menghasilkan baki debit atau baki debit kepada cukai tertunda tidak dibawa ke hadapan melainkan jangkaan yang munasabah ianya akan direalisasikan.

Potensi penjimatan cukai yang berkaitan dengan kerugian cukai dibawa ke hadapan hanya akan diiktiraf jika ada jaminan tanpa ragu-ragu bahawa pendapatan yang dikenakan cukai pada masa hadapan mencukupi bagi tujuan kerugian itu direalisasikan.

Kumpulan kini telah mengubah dasar perakaunannya bagi mengiktiraf cukai tertunda di atas perbezaan sementara yang timbul di antara jumlah yang berkaitan dengan aset-aset dan liabiliti-liabiliti bagi tujuan percukaian dan nilai yang dibawa mereka ke dalam penyata kewangan. Aset-aset cukai tertunda diiktiraf ke tahap di mana kemungkinan keuntungan dari cukai diperolehi berbanding dengan perbezaan sementara yang boleh ditolak atau kerugian cukai yang tidak digunakan boleh dipakai.

Sebagai tambahan, cukai tertunda diiktiraf pada perbezaan sementara yang timbul dari pelaburan di dalam anak-anak syarikat dan syarikat bersekutu melainkan sekiranya masa bagi pertukaran perbezaan sementara tidak akan ditukar pada masa yang terdekat ini.

Perubahan di dalam dasar perakaunan ini telah diambilkira secara retrospektif.

b. Faedah-faedah jangka pendek bagi pekerja

Kumpulan telah mengambilkira dasar perakaunan baru yang mengiktiraf cuti tahunan kakitangan yang tidak diambil setelah tamat tempoh dan telah diambilkira secara retrospektif.

43 Pengurusan risiko kewangan

Aktiviti-aktiviti Kumpulan mendedahkannya terhadap pelbagai risiko kewangan, termasuk:

- a. Risiko pertukaran matawang asing – risiko yang menyebabkan nilai instrumen kewangan turun naik disebabkan oleh perubahan-perubahan di dalam kadar pertukaran asing
- b. Risiko kadar faedah – risiko yang menyebabkan nilai instrumen kewangan turun naik disebabkan oleh perubahan-perubahan di dalam kadar faedah pasaran
- c. Risiko aliran tunai – risiko yang menyebabkan aliran tunai akan datang yang berkaitan dengan instrumen kewangan akan turun naik. Berhubung dengan kadar terapung instrumen hutang, kadar turun naik ini akan menghasilkan perubahan di dalam kadar faedah efektif, biasanya tanpa perubahan di dalam nilai saksamanya
- d. Risiko pasaran - risiko yang menyebabkan nilai instrumen kewangan akan turun naik disebabkan perubahan harga pasaran, samada perubahan-perubahan tersebut disebabkan faktor-faktor spesifik terhadap sekuriti individu atau penerbitnya atau faktor-faktor berkaitan semua sekuriti yang didagangkan di pasaran
- e. Risiko kredit - risiko yang menyebabkan satu pihak kepada instrumen kewangan gagal melaksanakan tanggungjawabnya dan menyebabkan pihak yang lain mengalami kerugian kewangan
- f. Risiko kecairan (risiko dana) – risiko di mana sesebuah syarikat mengalami kesukaran mendapatkan dana bagi memenuhi komitmen-komitmen yang berkaitan dengan instrumen-instruman kewangan

Program pengurusan risiko kewangan Kumpulan pada keseluruhanya tertumpu kepada pasaran kewangan yang tidak menentu dan mencari untuk meminimakan kesan-kesan negatif yang berpotensi ke atas prestasi kewangan Kumpulan.

Pengurusan risiko kewangan dilaksanakan melalui kajian-kajian risiko, sistem kawalan dalaman dan pematuhan dasar-dasar pengurusan risiko kewangan Kumpulan. Jemaah Pengarah kerap mengkaji risiko-risiko ini dan meluluskan dasar-dasar perbendaharaan, yang merangkumi pengurusan risiko-risiko ini.

a. Risiko pertukaran matawang asing

Kumpulan beroperasi di peringkat antarabangsa dan terdedah kepada risiko matawang disebabkan oleh urusniaga-urusniaga matawang asing, yang digunakan oleh syarikat-syarikat dalam matawang selain dari matawangnya sendiri.

Pendedahan Kumpulan terhadap turun naik matawang Ringgit Malaysia kepada Dolar AS adalah minima selagi Ringgit Malaysia terus diikat pada matawang tersebut. Sehubungan dengan pendedahan lain-lain matawang, Kumpulan tidak terlibat dengan sebarang kontrak hedging bagi menyekat pendedahan ke atas penerimaan dan pembayaran matawang asing, dan atas aliran tunai dijana dari urusniaga-urusniaga yang diharapkan didenominasikan di dalam matawang asing.

b. Risiko kadar faedah

Pendapatan dan aliran tunai dari operasi Kumpulan adalah bebas daripada perubahan-perubahan pada kadar faedah pasaran. Pendedahan kadar faedah timbul dari pinjaman dan deposit Kumpulan, dan diuruskan melalui penggunaan kadar hutang tetap dan terapung.

c. Risiko pasaran

Bagi pembelian produk utama, Kumpulan mengadakan tahap-tahap harga terapung dan tetap yang boleh diterima oleh Kumpulan dan melibatkan perjanjian bekalan fizikal, di mana perlu, bagi mencapai tahap-tahap ini.

43 Pengurusan risiko kewangan (sambungan)

d. Risiko kredit

Risiko kredit timbul apabila jualan dibuat mengikut terma kredit tertunda. Kumpulan mencari untuk mendapatkan pelaburan aset tunai yang selamat dan menguntungkan. Ia juga mencari untuk mendapatkan kawalan risiko kredit dengan menetapkan had-had counterparty dan memastikan jualan produk-produk dan perkhidmatan-perkhidmatan yang dibuat ke atas pelanggan yang mempunyai sejarah kredit yang mencukupi. Kumpulan mempertimbangkan risiko kerugian material dalam keadaan di mana ketiadaan prestasi oleh pihakcounter kewangan dijangka tidak akan berlaku.

Kumpulan tidak mempunyai tumpuan risiko kredit yang nyata melainkan kebanyakan depositnya ditempatkan dengan institusi-institusi kewangan yang besar di Malaysia.

Kumpulan berdagang dengan sejumlah besar pelanggan yang bertaburan di peringkat nasional dan antarabangsa namun di dalam industri di mana Kumpulan melakukan aktiviti-aktiviti utamanya seperti yang disebut di Nota 2. Disebabkan oleh faktor-faktor ini, pihak pengurusan percaya tiada penambahan risiko kredit terhadap jumlah penghutang Kumpulan yang melebihi jumlah yang dibenarkan sebagai kerugian pungutan.

e. Risiko kecairan

Kumpulan menguruskan profail hutang matangnya, aliran tunai daripada operasi dan dana yang mencukupi bagi memastikan kesemua bayaran dan kehendak-kehendak perolehan dana dicapai. Sebagai sebahagian daripada pengurusan kecairan berhemat, Kumpulan mengekalkan tahap tunai yang mencukupi atau pelaburan yang boleh ditukar tunai bagi mencapai kehendak-kehendak modal kerjanya. Memandangkan keadaan dinamik perniagaan yang sedia ada, Kumpulan berhasrat untuk mengekalkan fleksibiliti dana dengan terus memperolehi kemudahan-kemudahan kredit secara komited.

44 Angka-angka perbandingan

Angka-angka perbandingan di dalam penyata kewangan yang disatukan telah diubahsuai bagi menggambarkan penggunaan kaedah penggabungan perakaunan di atas pembelian Sistem Televisyen Malaysia Berhad (“STMB”).
