CHAIRMAN'S STATEMENT

On behalf of the Board of Directors of Negri Sembilan Oil Palms Berhad, I take great pleasure in presenting the Annual Report and the Audited Financial Statements of the Group and of the Company for the financial year ended 31 December 2013.

During the financial year under review, the average selling prices of crude palm oil weakened due to high levels of inventory. Initiatives to address this extremely high level of inventory in the country had been taken by the authorities in order to normalise the inventory situation and stabilise prices.

Since the end of the financial year under review, selling prices of crude palm oil have improved underpinned by fundamentals such as lower production and higher demand. The recent unfavourable weather conditions has also caused concern on production. The implementation of biodiesel programmes is expected to hold up crude palm oil prices.

Financial and operation review of the Group

Revenue of the Group for the financial year 2013 decreased by 12.51% to RM74,671,885 from RM85,349,164 a year ago.

This is mainly due to decrease in the average selling prices of ffb, crude palm oil and palm kernel when compared with those a year ago even though the sales volume of crude palm oil and palm kernel were higher.

There was an increase of RM17,500,000 in the fair value of biological assets.

An overall profit of RM312,984 in share of results of associates was mainly due to profit contributed by an associate engaged in trading in stocks and shares.

Overall loss of RM3,804,225 in share of results of a joint venture was mainly due to a decrease in the fair value of its biological assets.

Overall, profit after tax of the Group increased by 77.20% to RM22,270,648 from RM12,568,341 and correspondingly, earnings per stock unit increased to 26.06 sen from 14.45 sen.

However, excluding the changes in fair value of biological assets, profit after tax of the Group decreased by 64.30% to RM9,145,648 from RM25,618,341.

Production of ffb decreased by 4.07% to 118,223 m/t. Purchase of ffb increased by 102.07% to 24,291 m/t. Overall, production of crude palm oil increased by 9.53% to 21,833 m/t and production of palm kernel increased by 7.56% to 5,744 m/t.

During the financial year 2013, an additional 441 hectares of old and low yield palms were replanted. Replanting of approximately 715 hectares of old and low yield palms will take place during the financial year 2014.

Dividends

Total gross dividends of 9% single tier in respect of the financial year ended 31 December 2013 were paid during the financial year, i.e. a first interim dividend of 4% single tier was paid on 28 June 2013 and a second interim dividend of 5% single tier was paid on 31 December 2013. The total dividend payments for the financial year under review decreased by 58.62% to RM6,318,177 from RM15,268,926, as profit net of tax attributable to owners of the Company, excluding the changes in fair value of biological assets decreased by 66.13% to RM7,075,031.

In view of the payment of the interim dividends, the Board do not recommend the payment of a final dividend in respect of the financial year ended 31 December 2013.

Joint venture on oil palm plantation in Indonesia

As at 31 December 2013, approximately 2,653 hectares of land have been planted of which 1,969 hectares have attained maturity and the remaining 684 hectares are immature.

However, harvesting of young mature palms of the joint venture engaged in oil palm plantation in Indonesia has been delayed due to unrest in the villages nearby the estate. Commencement of harvesting is pending clearance by the relevant authorities.

CHAIRMAN'S STATEMENT

Recurrent related party transactions

The Company announced on 16 May 2014 that it proposes to seek the approval of shareholders for the proposed renewal of the shareholders' mandate for the Group to enter into recurrent related party transactions of a revenue or trading nature with a related party at the forthcoming Annual General Meeting. A separate Circular to Shareholders, the purpose of which is to provide information on the proposed renewal of shareholders' mandate and to seek the approval for the ordinary resolution pertaining to the proposed renewal of shareholders' mandate is enclosed together with the Annual Report.

Outlook for Year 2014

The selling prices of ffb, crude palm oil and palm kernel have strengthened since the end of the previous financial year. Should this trend continue, it would have a corresponding effect on the financial performance for financial year 2014.

Appreciation

On behalf of the Board of Directors, I would like to thank the management and staff for their diligence and commitment. Our suppliers and customers also deserve our thanks for their understanding and support. Lastly, I would like to thank our shareholders for their patience and support.

During the financial year 2013, an additional 441 hectares of old and low yield palms were replanted. Replanting of approximately 715 hectares of old and low yield palms will take place during the financial year 2014.

The Group has a replanting schedule covering a period of ten years and this schedule is reviewed quarterly which will ensure progressive replanting on a yearly basis. At each review, prevailing conditions and circumstances are taken into consideration to determine the replanting programme.

Production of ffb decreased by 4.07% to 118,223 m/t. Purchases of ffb increased by 102.07% to 24,291 m/t. Overall, production of crude palm oil increased by 9.53% to 21,833 m/t and production of palm kernel increased by 7.56% to 5,744 m/t. The decrease in production of ffb was mainly due to additional areas of old and low yield palms being replanted.

Annual ffb yield per hectare is 19.13 m/t. The mills processed 115,009 m/t of ffb during the financial year 2013. The overall average oil and kernel extraction rates of the mills are 18.98% and 4.99% respectively.

The Group faces shortage of labour in Malaysia. Measures such as improving incentives and welfare are being implemented to attract workers. Furthermore, the Group is also recruiting foreign workers from various sources rather than depending on a single source.

The Group has also taken measures to plant better yielding seedlings during its replanting programme.

Good agriculture and milling practices are constantly being implemented with the aim to improve productivity and efficiency.

In an effort to optimise the utilisation of land, the Group is studying the possibility and feasibility of planting other cash-crops in areas that are not suitable for planting of oil palms.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Joint venture on oil palm plantations in Indonesia

Harvesting of young mature palms of the joint venture engaged in oil palm plantation in Indonesia has been delayed due to unrest in the villages nearby the estate. Commencement of harvesting is pending clearance by the relevant authorities.

Prospects

The selling prices of ffb, crude palm oil and palm kernel have strengthened since the end of the previous financial year. Should this trend continue, it would have a corresponding effect on the financial performance for financial year 2014.

The Group remains optimistic about the long term prospects of palm oil business. Palm oil is one of the vital oils in meeting the world's dietary and energy requirements. Besides its nutritional values, palm oil is widely available and affordable. Palm oil also has vast potential as a renewable energy source. Hence, the global demand for palm products should continue to grow.

2. Summary of significant accounting policies (cont'd.)

2.2 Changes in accounting policies (cont'd.)

FRS 10 Consolidated financial statements

FRS 10 replaces part of FRS 127 Consolidated and Separate Financial Statements that deals with consolidated financial statements and IC Interpretation 112 Consolidation – Special Purpose Entities.

Under FRS 10, an investor controls an investee when

- (a) the investor has power over an investee;
- (b) the investor has exposure, or rights, to variable returns from its investment with the investee; and
- (c) the investor has ability to use its power over the investee to affect the amount of the investor's returns.

Under FRS 127 Consolidated Financial Statements, control was defined as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

FRS 10 includes detailed guidance to explain when an investor that owns less than 50% of the voting shares in an investee has control over the investee. FRS 10 requires investor to take into account all relevant facts and circumstances, particularly the size of the investor's holding of voting rights relative to the size and dispersion of holdings of the other vote holders. The adoption of FRS 10 did not have any financial impact on the Group.

FRS 11 Joint Arrangements

FRS 11 replaces FRS 131 Interests in Joint Ventures and IC Interpretation 113 Jointly-Controlled Entities - Non-monetary Contributions by Venturers.

The classification of joint arrangements under FRS 11 is determined based on the rights and obligations of the parties to the joint arrangements by considering the structure, the legal form, the contractual terms agreed by the parties to the arrangement and when relevant, other facts and circumstances. Under FRS 11, joint arrangements are classified as either joint operations or joint ventures.

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

FRS 11 removes the option to account for jointly controlled entities ("JCE") using proportionate consolidation. Instead, JCE that meet the definition of a joint venture must be accounted for using equity method.

Upon adoption of FRS 11, the Group has re-evaluated its involvement in its only joint arrangement and has reclassified the investment from a jointly controlled entity to a joint venture. Notwithstanding the reclassification, the investment continues to be recognised using equity method. The change does not have any other impact on the Group's consolidated financial position or performance.

FRS 12 Disclosures of Interests in Other Entities

FRS 12 includes all disclosure requirements for interests in subsidiaries, joint arrangements, associates and structured entities. A number of new disclosures are required. This standards affects disclosures and has no impact on the Group's and the Company's financial position or performance.

2. Summary of significant accounting policies (cont'd.)

2.2 Changes in accounting policies (cont'd.)

FRS 13 Fair Value Measurement

FRS 13 establishes a single source of guidance under FRS for all fair value measurements. FRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under FRS. FRS 13 defines fair value as an exit price. As a result of the guidance in FRS 13, the Group re-assessed its policies for measuring fair values. Application of FRS 13 has not materially impacted the fair value measurements of the Group. Additional disclosures where required, are provided in the individual notes relating to the assets and liabilities whose fair values were determined. Notwithstanding the above, the change had no significant impact on the measurements of the Group's and the Company's assets and liabilities.

Amendments to FRS 101: Presentation of Items of Other Comprehensive Income

The amendments to FRS 101 introduce a grouping of items presented in other comprehensive income. Items that will be reclassified ("recycled") to profit or loss at a future point in time (eg. net loss or gain or gain on available-for-sale financial assets) have to be presented separately from items that will not be reclassified (eg. revaluation of land and buildings). The amendments affect presentation only and have no impact on the Group's and the Company's financial position or performance.

FRS 127 Separate Financial Statements

As a consequence of the new FRS 10 and FRS 12, FRS 127 is limited to accounting for subsidiaries, joint ventures and associates in separate financial statements.

FRS 128 Investments in Associates and Joint Ventures

As a consequence of the new FRS 11 and FRS 12, FRS 128 is renamed as FRS 128 Investments in Associates and Joint Ventures. This new standard describes the application of the equity method to investments in joint ventures in addition to associates.

2.3 Standards issued but not yet effective
