CORPORATE mission

- We are a business entity
- Gas is our core business
- Our primary responsibility is to add value to this natural resource

The Company operates six Gas Processing Plants (GPP) which process natural gas from the offshore fields of Terengganu. Four of these plants are located in Kertih and the other two in Paka, Terengganu. The plants have a proven sales gas production capacity of 2,060 million standard cubic feet per day (mmscfd) in addition to gas derivative products such as Ethane, Propane, Butane, Condensates and Carbon Dioxide. In addition, the Company has standby units in Kertih and Paka with a total capacity of 750 mmscfd.

The sales gas produced is transmitted via 2,505km Peninsular Gas Utilisation (PGU) pipelines to end-users in the power, industrial and commercial sectors. The Company also delivers sales gas to customers in East Malaysia through a 45km pipeline.

The Company currently employs over 1900 staff located all over the nation. To ensure that the Company meets its business objectives as well as its corporate social responsibilities, employees' capabilities and competencies are continuously enhanced through structured training programmes and by being active members of the communities in where they work.
