

PMB RECYCLING MANAGEMENT SDN. BHD.

PMB Recycling Management Sdn. Bhd. is the only company in Malaysia to acquire the technology from Sweden, Akzo Nobel Group of companies in 1999 to recycle the aluminium waste from the anodizing process for the manufacturing of Polyaluminium Chloride (PAC). The aluminium sludge, N151, is classified as Scheduled Waste under the

Environmental Quality (Schedule Wastes) Regulations 1989. Disposal of such waste is closely monitor by the Department of Environment. The PAC plant is fully operational. At present, the company is collecting the aluminium waste from several local anodizing plants for the purpose of PAC manufacturing. By doing so, it help the government to dispose and treat the aluminium waste, which is in the line with the Malaysia government's policy of creating a cleaner and healthier environment for the future generation.

The company also cooperates with the local chemical company to market the product (PAC) for use as a coagulant in the potable and industrial water treatment plant and also the pulp and paper industries.

PMB Recycling Management Sdn. Bhd. (PMBR) was incorporated on 10 April 1996. The principal activities are to carry on the business of recycling of waste, operation, maintenance, construction of waste recycling projects and trading of waste treatment products and recycling equipment.

PMB SPECTRUM SDN. BHD.

The company is a joint venture between Press Metal Berhad and Central Spectrum (M) Sdn. Bhd. and is currently developing about 105 acres of industrial land located next to Westport in Pulau Indah.

Having completed and sold Phase 1 successfully, the company has embarked on Phase 2 of the development. With the change in current economic environment and increase in demand for vacant industrial land, the company has strategized to convert all its terrace factories and semi-detached factories to industrial lots to meet this demand. This change will benefit the company through cost reduction and increase in revenue.

PMB Spectrum Sdn. Bhd. (PMBS) was incorporated on 29 August 1996. The principal activity of the company consists of development of industrial parks with common wastewater treatment plant facilities and other development projects.

BI-PMB WASTE MANAGEMENT SDN. BHD.

First of its kind in Malaysia to cater to treatment to a wide range of electroplating waste, the Common Waste Water Treatment Plant (CWWTP) has not only kept the environment clean but has helped the country eradicate the nuisance of backyard factories and illegal dumping of waste into the rivers.

Operationally since 1998, the treatment plant has since significant growth as more electroplaters realize the cost efficiency in using the facility rather than having to treat the waste themselves and at the same time complying with stringent environment regulations as required by the government.

BI-PMB Waste Management Sdn. Bhd. was incorporated in September 1990 and assumed its present name in April 1995. The company is a collaboration between Bank Industri (M) Berhad and Press Metal Berhad to set up a Common Waste Water Treatment Plant (CWWTP) to treat toxic waste discharged by the electroplaters in the Bukit Kemuning Electroplating Park (BKEP).
