

## Angkasa Jasa Sdn. Bhd.

We are moving forward towards a more promising year as our participation to fully realise our Prime Minister's vision of a fully developed nation by 2020 are shifting into high gear.

We are again required to face new challenges with an awareness of injecting the latest technological system to maintain a progressive firm.

With a dedicated team of system designer, we engineer and develop cost effective and future oriented solution to fully coordinate with other trades during construction without comprising on stringent building by law.

Furthermore we are backed by a distinctive project management system and team to ensure our reputation is solid just like the high quality product we built.

Customer services and satisfaction shall continues to remain our priority and combined with an extensive and continued research and development programme, we intend to remain at the forefront for stainless steel and aluminium fitout system.

We are unbending in our maintenance of high production standards, just as we are uncompromising in the provision of excellent services to the following projects.

Putrajaya 2G5, Jabatan Pendaftaran Negara, Putrajaya – unitised curtain walling system, aluminium window wall system, interior glazing system and exterior frameless glass system
