1. GENERAL

The Company is a public listed company limited by way of shares incorporated in Malaysia under the Companies Act, 1965. The Company is domiciled in Malaysia.

2. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of preparation

The financial statements comply with applicable approved accounting standards issued by the Malaysian Accounting Standards Board and with the provisions of the Companies Act, 1965.

The measurement bases applied in the preparation of the financial statements include cost, recoverable value, realisable value, revalued amount and fair value. Estimates are used in measuring these values.

(b) Subsidiary companies

A subsidiary company is a company controlled by the Company. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of a company so as to obtain benefits from its activities.

The Company's interests in subsidiary companies are stated at cost less impairment losses. Impairment losses are charged to the income statement.

On disposal, the difference between the net disposal proceeds and the carrying amount of the subsidiary company disposed of is taken to the income statement.

(c) Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and of all its subsidiary companies made up to the end of the financial year. All inter-company transactions are eliminated on consolidation and the consolidated financial statements reflect external transactions only. All subsidiary companies are consolidated on the acquisition method of accounting.

Under the acquisition method of accounting, the results of subsidiary companies acquired or disposed of during the financial year are included from the date of acquisition or up to the date of disposal. At the date of acquisition, the fair values of the subsidiary companies' net assets are determined and these values are reflected in the consolidated financial statements.

The difference, if any, between the acquisition cost and these fair values is reflected as goodwill or discount on acquisition as appropriate. However, if the amounts involved are immaterial, goodwill or discount on acquisition is taken to the income statement as and when they arise.

Where goodwill is considered to be capable of generating future economic benefits, it is capitalised in the financial statements and amortised on a straight-line basis over its estimated useful life or 25 years, whichever is shorter; otherwise it is written off in the income statement in the year of acquisition.

Discount on acquisition is either taken to the income statement as they arise or retained in the balance sheet and credited to the income statement over a suitable period, depending on the particular circumstances which gave rise to it.

Minority interest represents the interests of outside members in the operating results and net assets of subsidiary companies.

(d) Associated companies

Associated companies are those companies in which the Group holds a long term equity interest, has representation on the board of directors and is in a position to exercise significant influence over financial and operating policies.

ACCOUNTING
POLICIES AND
EXPLANATORY
NOTES
FOR THE YEAR ENDED
31 DECEMBER 2004

Investments in associated companies are stated at cost less impairment losses. Impairment losses are charged to the income statement.

On disposal, the difference between net disposal proceeds and the carrying amount of the associated company disposed of is taken to the income statement.

Investments in associated companies are accounted for in the consolidated financial statements by the equity method of accounting. The equity method of accounting involves recognising in the consolidated financial statements the Group's share of the results of associated companies for the financial year. The Group's investments in associated companies are carried in the consolidated balance sheet at an amount that reflects its share of the net assets of the associated companies and includes premium or discount on acquisition.

Equity accounting is discontinued when the carrying amount of the investment in an associated company diminishes by virtue of losses to zero, unless the Group has incurred or guaranteed obligations in respect of the associated company.

Unrealised gains on transactions between the Group and its associated companies are eliminated to the extent of the Group's interest in the associated companies. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. Where necessary, in applying the equity method, adjustments are made to the financial statements of associated companies to ensure consistency with accounting policies of the Group.

The results and reserves of associated companies are accounted for in the consolidated financial statements based on audited and/or unaudited management accounts made up to the end of the financial year.

(e) Jointly controlled entities

Jointly controlled entities are corporations, partnerships or other entities in which there is a contractual agreement whereby the Group and other parties have joint control over the economic entities.

The Group's interests in jointly controlled entities are accounted for in the consolidated financial statements by the equity method of accounting.

Unrealised gains on transactions between the Group and jointly controlled entities are eliminated to the extent of the Group's interest in the jointly controlled entities. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. Where necessary, in applying the equity method, adjustments are made to the financial statements of jointly controlled entities to ensure consistency with accounting policies of the Group.

(f) Other investments

Other investments comprise quoted and unquoted equity shares stated at cost. An allowance for diminution in value is made if the directors are of the opinion that there is a decline in the value of such investments which is other than temporary. The diminution in value is charged to the income statement.

On disposal, the difference between the net disposal proceeds and the carrying amount of the other investment disposed of is taken to the income statement.

(g) Property, plant and equipment

(i) *Measurement basis*

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses, if any.

Property, plant and equipment retired from active use and held for disposals are stated at the lower of net book value and net realisable value.

(ii) *Depreciation*

Freehold land and capital work-in-progress are not depreciated while leasehold land and buildings are amortised on the straight-line basis over the remaining period of the lease.

New planting expenditure incurred on land clearing and upkeep of trees up to maturity is capitalised under land cost and is depreciated on a straight-line basis over the remaining lease period of the plantation land from the date of maturity.

Replanting expenditure is charged to the income statement when incurred.

Depreciation of the vessel owned by the Group is calculated on a straight-line basis to write off its cost net of estimated residual values over its expected useful life of 240 months. Cost includes the cost of any major enhancements and improvements which increase the future benefits from the vessel beyond its previously assessed standard of performance. The cost of routine replacements and repairs is written off in the income statement as and when they are incurred.

Depreciation is calculated to write off the cost of other property, plant and equipment on a straight-line basis over their estimated useful lives.

The principal annual rates used for this purpose are:

Buildings and civil works	2% - 5% or the lease period if shorter
Plant and machinery	5% - 10%
Motor vehicles	20% - 25%
Furniture, fittings, office and other equipment	10% - 20%

(h) *Leases*

Leases in which the Group assumes substantially all the risks and rewards of ownership are classified as finance leases. Property, plant and equipment acquired by way of finance leases are stated at amounts equal to the lower of their fair values and the present value of minimum lease payments at the inception of the leases, less accumulated depreciation and any impairment losses.

In calculating the present value of the minimum lease payments, the discount rate is the interest rate implicit in the lease, if this is determinable; if not, the Group's incremental borrowing rate is used.

All other leases are treated as operating leases. Operating lease rentals are charged to the income statement on a straight-line basis over the period of the lease.

(i) *Development properties*

Development properties are classified under two categories i.e. land held for property development and property development costs.

Land held for property development is defined as land on which development is not expected to be completed within the normal operating cycle. Usually, no significant development work would have been undertaken on these lands. Accordingly, land held for property development is classified as non-current assets on the balance sheet and is stated at cost plus incidental expenditure incurred to put the land in a condition ready for development.

Land on which development has commenced and is expected to be completed within the normal operating cycle is included in property development costs. Property development costs comprise all costs that are directly attributable to development activities or that can be allocated on a reasonable basis to such activities.

Where the outcome of a development can be reasonably estimated, revenue is recognised on the percentage of completion method. The stage of completion is determined by the proportion that costs incurred to-date bear to estimated total costs. In applying this method of determining stage of completion, only those costs that reflect actual development work performed are included as costs.

Where the outcome of a development cannot be reasonably estimated, revenue is recognised to the extent of property development costs incurred that is probable will be recoverable, and the property development costs on the development units sold shall be recognised as an expense in the period in which they are incurred.

When it is probable that total costs will exceed revenue, the foreseeable loss is immediately recognised in the income statement irrespective of whether development work has commenced or not, or of the stage of completion of development activity, or of the amounts of profits expected to arise on other unrelated development projects.

The excess of revenue recognised in the income statement over the billings to purchasers of properties is recognised as accrued billings under current assets.

The excess of billings to purchasers of properties over revenue recognised in the income statement is recognised as progress billings under current liabilities.

(j) Engineering contracts

The Group's engineering contracts comprise substantially fixed price contracts and where their outcome can be reasonably estimated, revenue is recognised on the percentage of completion method. The stage of completion is determined by the proportion that costs incurred to-date bear to estimated total costs, and for this purpose, only those costs that reflect actual contract work performed are included as costs incurred.

Where the outcome of an engineering contract cannot be reasonably estimated, revenue is recognised only to the extent of contract costs incurred that are expected to be recoverable. At the same time, all contract costs incurred are recognised as an expense in the period in which they are incurred.

Costs that relate directly to a contract and which are incurred in securing the contract are also included as part of contract costs if they can be separately identified and measured reliably and it is probable that the contract will be obtained.

When it is probable that total costs will exceed total revenue, the foreseeable loss is immediately recognised in the income statement irrespective of whether contract work has commenced or not, or of the stage of completion of contract activity, or of the amounts of profits expected to arise on other unrelated contracts.

On the balance sheet, contracts in progress are reflected either as gross amounts due from or due to customers, where a gross amount due from customers is the surplus of (i) costs incurred plus profits recognised under the percentage of completion method over (ii) recognised foreseeable losses plus progress billings. A gross amount due to customers is the surplus of (ii) over (i).

(k) Inventories

Inventories are stated at the lower of cost and net realisable value. Except in the case of livestock, cost is determined on either the first-in-first-out basis or the weighted average basis, depending on the nature of the inventories. Cost comprises the landed cost of goods purchased, and in the case of work-in-progress and finished goods, includes an appropriate proportion of factory overheads.

Livestock comprises broilers, pullets and layers parent stock and hatchable eggs. Livestock is valued at the lower of amortised cost and net realisable value. Cost includes the cost of the parent stock plus all attributable costs including overheads incurred in nursing the parent stock to the point of lay, and such cost is then amortised over its estimated economic life. Net realisable value is defined as the aggregate income expected to be generated from total day old chicks and eggs to be produced and proceeds from the disposal of the ex-broiler parent stock less expenses expected to be incurred to maintain the parent stock up to its disposal.

(l) Receivables

Receivables are stated at cost less allowance for doubtful debts.

Known bad debts are written off and allowance is made for any receivables considered to be doubtful of collection.

(m) Impairment of assets

An impairment loss is recognised whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses are charged to the income statement.

Property, plant and equipment, land held for property development, intangible assets, deferred tax assets, investment in subsidiary companies, associated companies and jointly controlled entities are assessed at each balance sheet date to determine whether there is any indication of impairment. If such an indication exists, the asset's recoverable amount is estimated. The recoverable amount is the higher of an asset's estimated net selling price and its discounted future cash flows expected to be generated from the use of the asset. Recoverable amounts are estimated for each individual asset or, if this is not possible, for the cash-generating unit to which the asset belongs.

Any reversal of an impairment loss as a result of a subsequent increase in recoverable amount should not exceed the carrying amount that would have been determined (net of amortisation or depreciation, if applicable) had no impairment loss been previously recognised for the asset.

(n) Payables

Payables are stated at cost.

(o) Share capital

Ordinary shares are recorded at the nominal value and proceeds received in excess of the nominal value of shares issued, if any, are accounted for as share premium. Both ordinary shares and share premium are classified as equity. Cost incurred directly attributable to the issuance of shares are accounted for as a deduction from share premium, if any, otherwise it is charged to the income statement.

Dividends to shareholders are recognised in equity in the period in which they are declared.

(p) Income recognition

(i) Revenue from sale of goods is measured at the fair value of the consideration receivable and is recognised in the income statement when the significant risks and rewards of ownership have been transferred to the buyer.

(ii) Revenue from engineering contracts and the sale of development properties is recognised on the percentage of completion method, where the outcome of the contract can be reliably estimated.

Revenue from engineering contracts represents the proportionate contract value on engineering contracts attributable to the percentage of contract work performed during the financial year.

Revenue from the sale of development properties represents the proportionate sales value of development properties sold attributable to the percentage of development work performed during the financial year.

(iii) Revenue from box office collections, filmlet income, sale of movie rights and film rental is recognised upon the exhibition of the movie or filmlet.

(iv) Dividend income is recognised when the right to receive payment is established.

(v) Interest income is recognised on a time proportion basis.

(vi) Rental income is recognised on a straight-line basis over the specific tenure of the respective leases.

(vii) Net voyage income is recognised over the period of the voyage on a pro-rata basis.

(q) Borrowing costs

Borrowing costs incurred on assets under development that take a substantial period of time for completion are capitalised into the carrying value of the assets. Capitalisation of borrowing costs ceases when development is completed or during extended periods when active development is interrupted.

All other borrowing costs are charged to the income statement in the period which they are incurred. The interest component of hire purchase payments is charged to the income statement over the hire purchase period so as to give a constant periodic rate of interest on the remaining hire purchase liabilities.

(r) Foreign currencies

(i) *Transactions in foreign currencies*

Transactions in foreign currencies are translated to Ringgit Malaysia at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated to Ringgit Malaysia at the foreign exchange rates ruling at that date or the foreign currency forward contract rates when there are related or matching forward contracts. Foreign exchange differences arising on translation are recognised in the income statement. Non-monetary assets and liabilities which are carried in terms of historical costs denominated in foreign currencies are translated to Ringgit Malaysia at the foreign exchange rates ruling at the date of the transaction.

(ii) *Translation of foreign currency financial statements*

All of the Group's foreign subsidiary companies fall within the classification of foreign entities under *MASB Standard 6 - The Effect of Changes in Foreign Exchange Rates*.

For consolidation purposes, all assets and liabilities, including fair values adjustments of foreign subsidiary companies are translated at the exchange rates ruling at the balance sheet date. Income and expense items are translated at exchange rates approximating those ruling on transaction dates. All exchange differences arising from the translation of the financial statements of foreign subsidiary companies are dealt with through the exchange translation reserve account.

(iii) *Closing rates used*

The closing rates used in translation were as follows:

(s) Employee benefits

(i) *Short term employee benefits*

Wages, salaries, paid annual leave, paid sick leave, bonuses and non-monetary benefits are recognised as an expense in the period in which the associated services are rendered by employees.

(ii) *Equity compensation benefits*

A subsidiary company of the Group, namely, PPB Oil Palms Berhad ("PPBOP") had an Employees' Share Option Scheme ("ESOS") in place. Options granted under the ESOS entitle employees to acquire equity shares in PPBOP. No compensation cost or obligation is recognised in the financial statements. When the options are exercised, equity is increased by the amount of the proceeds received. The ESOS, which was effective on 20 August 1998, expired on 19 August 2003 after a period of 5 years.

(iii) *Post-employment benefits*

The Company and its Malaysian subsidiary companies pay monthly contributions to the Employees Provident Fund ("EPF") which is a defined contribution plan.

The legal or constructive obligation of the Company and its Malaysian subsidiary companies is limited to the amount that they agree to contribute to the EPF. The contributions to the EPF are charged to the income statement in the period to which they relate.

Some of the Company's foreign subsidiary companies make contributions to their respective countries' statutory pension schemes which are recognised as an expense in the income statement as incurred.

(iv) *Termination benefits*

The Group recognises termination benefits payable as a liability and an expense when it is demonstrably committed to terminate the employment of current employees according to a detailed formal plan without realistic possibility of withdrawal.

(t) Taxation

The tax expense in the income statement represents the aggregate amount of current tax and deferred tax included in the determination of net profit or loss for the financial year.

On the balance sheet, a deferred tax liability is recognised for taxable temporary differences while a deferred tax asset is only recognised for deductible temporary differences, unutilised tax losses and unutilised tax credits to the extent that it is probable that taxable profit will be available in future against which the deductible temporary differences, tax losses and tax credits can be utilised. No deferred tax is recognised for temporary differences arising from:

- (i) goodwill for which amortisation is not deductible for tax purposes, or
- (ii) negative goodwill which is treated as deferred income, or
- (iii) the initial recognition of an asset or liability which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit.

Deferred tax assets and liabilities are measured based on tax consequences that would follow from the manner in which the asset or liability is expected to be recovered or settled, and based on the tax rates enacted by the balance sheet date that are expected to apply to the period when the asset is realised or when the liability is settled.

Current tax and deferred tax are charged or credited directly to equity if the tax relates to items that are credited or charged, whether in the same or a different period, directly to equity.

(u) Cash equivalents

Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant risk of changes in value. For the purpose of the cash flow statement, cash and cash equivalents are presented net of bank overdrafts.

(v) Rounding of amounts

Unless otherwise indicated, the amounts in these financial statements have been rounded to the nearest thousand. The currency used is Ringgit Malaysia ("RM").

(w) Financial instruments

A financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise.

(i) *Financial instruments recognised in the balance sheet*

The Group's financial instruments which are recognised in the balance sheet comprise cash and cash equivalents, other investments, receivables and payables, borrowings, hire purchase liabilities and ordinary shares. These financial instruments are recognised when a contractual relationship has been established. The accounting policies and methods adopted, including the basis of measurement applied are disclosed above, where relevant. The information about the extent and nature of these recognised financial instruments, including significant terms and conditions that may affect the amount, timing and certainty of future cash flows are disclosed in the respective notes below, where applicable.

(ii) *Financial instruments not recognised in the balance sheet*

The Group's financial instruments which are not recognised in the balance sheet comprise derivatives (primarily foreign currency forward contracts and commodities futures). These derivative financial instruments are not recorded as an asset or a liability. The objective of entering into these derivatives is to protect the Group against unfavourable exchange rate and commodity price movements. Gains or losses from changes in the fair value of forward contracts offset the corresponding losses or gains on the receivables and payables covered by the forward contracts.

(x) Disclosure of fair value

Cash and cash equivalents, trade and other receivables, trade and other payables, short term investments and short term borrowings.

The carrying amounts approximate fair values because of the short maturities of these instruments.

Long term investments

The fair value of quoted investments is estimated based on quoted market prices. For unquoted investments, a reasonable estimate of fair value is not practical as it would involve incurring excessive costs. Therefore, such investments are valued at cost subject to review for diminution in value.

Long term borrowings and debts

The carrying amounts of the Group's long term floating-rate borrowings approximate fair value. The fair value of the Group's long term fixed-rate borrowings and debts is estimated using discounted cash flow analyses, based on current market interest rates available to the Group for similar types of lending and borrowing arrangements.

Foreign currency contracts and commodities future contracts

The fair value of foreign currency contracts and commodities future contracts is estimated based on quotes obtained from brokers.

3. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's activities expose it to a variety of financial risks, including foreign currency exchange risk, interest rate risk, market risk, credit risk, liquidity and cash flow risk. The Group's overall financial risk management objective is to minimise potential adverse effects on the financial performance of the Group.

Financial risk management is carried out through risk reviews, internal control systems, insurance programme and adherence to financial risk management policies. The Group enters into derivative instruments, principally foreign currency forward contracts, to hedge its exposure to financial risks. The Group's management reviews and agrees on policies for managing each of the financial risks and they are summarised below.

The Group does not trade in derivative instruments.

Foreign currency exchange risk

The Group is exposed to currency risk as a result of foreign currency transactions entered into in currencies other than their functional currency. The Group enters into forward foreign currency contracts to limit its exposure on foreign currency receivables and payables, and on cash flows from anticipated transactions denominated in foreign currencies.

The Group's operations in Indonesia are funded with USD bank loans. Whilst benefiting from the lower USD interest cost, these operations are exposed to currency risks. The Group constantly monitors the exchange rate movements and whenever feasible, will utilise derivative instruments to hedge the revenue and expenditure in IDR against scheduled USD loan draw downs and repayments.

Interest rate risk

The Group is exposed to interest rate risk which is the risk that a financial instrument's value will fluctuate as a result of changes in market interest rates.

The Group's income and operating cash flows are substantially independent of changes in market interest rates. Exposure to changes in interest rate risk relates primarily to the Group's deposits placed with creditworthy licensed banks and financial institutions and bank borrowings.

Financial Assets

By placing its deposits on short tenures that generate interest income based on prevailing market rates, the Group is able to reduce its exposures to interest rates fluctuations.

Financial Liabilities

The Group minimises its interest rate risk by maintaining its bank borrowings mainly on floating rates which vary according to changes in market interest rates. This enables the Group to capitalise on cheaper funding in a low interest rate environment. In addition, the Group addresses its exposure to fluctuating interest rates by utilising interest rate swap facilities with financial institutions when appropriate.

Market risk

The Group's exposure to market risk arises mainly from fluctuation in the prices of key raw materials. The Group manages this risk by using commodity futures contracts, cost plus contracts and fixed margin contracts, where relevant, to hedge its exposure.

The Group is also exposed to market risks arising from changes in value caused by movements in market price of its equity investments. The risk of loss is minimised via thorough analyses before investing and continuous monitoring of the performance of the investments. The Group optimises returns by disposing of investments after thorough analyses.

Credit risk

Credit risk arises from the possibility that a counter party may be unable to meet the terms of a contract in which the Group has a gain position.

The Group's management has a credit policy in place to ensure that transactions are conducted with creditworthy counter parties.

The Group's credit risk is primarily attributable to the trade receivables arising from the sale of goods and the futures contracts entered into by a subsidiary company's clients.

Exposure to credit risk arising from sales made on deferred credit terms is managed through the application of credit approvals, credit limits and monitoring procedures on an ongoing basis. If necessary, the Group may obtain collaterals from counter parties as a means of mitigating losses in the event of default.

As a futures broker, the subsidiary company could be held responsible for the default or misconduct of its clients. Other than the requirement for clients to maintain margin deposits with Malaysian Derivatives Clearing House Bhd, the subsidiary company mitigates the default risk by retaining an appropriate level of clients' assets and acting as futures broker only for subsidiary companies and associated companies of the Company.

The Group seeks to invest its surplus cash safely by depositing them with licensed financial institutions.

Liquidity and cash flow risk

The Group seeks to ensure all business units maintain optimum levels of liquidity at all times, sufficient for their operating, investing and financing activities.

Therefore, the policy seeks to ensure that each business unit, through efficient working capital management (i.e. inventory, accounts receivable and accounts payable management), must be able to convert its current assets into cash to meet all demands for payment as and when they fall due.

Owing to the nature of its businesses, the Group seeks to maintain sufficient credit lines available to meet its liquidity requirement while ensuring an effective working capital management within the Group.

Subject to agreement with the Inland Revenue Board, based on the estimated tax credits available and the prevailing tax rate applicable to dividends and the balance on the exempt account, approximately RM752.868 million of the unappropriated profit of the Company is available for distribution by way of dividends without incurring additional tax liability. The balance of the unappropriated profit of RM230.559 million is not covered by the tax credit, therefore, any distribution in excess of RM752.868 million would incur additional tax liability.

10. EARNINGS PER SHARE

Basic earnings per share

The basic earnings per share has been calculated by dividing the Group's net profit for the year of RM400.664 million (2003: RM371.253 million) by the weighted average number of shares in issue of 528.572 million (2003: 490.623 million). The weighted average number of share in issue is calculated as follows:

	2004	2003
	'000	'000
Number of ordinary shares at 1 January	490,623	490,623
Effect of shares issued pursuant to Privatisation of FFM	37,949	-
Weighted average number of ordinary shares	<u>528,572</u>	<u>490,623</u>

Diluted earnings per share

In 2003, the diluted earnings per share was calculated by dividing the Group's net profit for that year, adjusted for the after tax effect on income that would result from the conversion of ordinary shares under options granted by a subsidiary company, PPB Oil Palms Berhad, pursuant to its ESOS, and 490.623 million shares in issue during 2003. The adjusted net profit is calculated as follows:

	2004	2003
	RM'000	RM'000
Net profit for the year	-	371,253
Group's share of the effect of potential dilution in PPB Oil Palms Berhad's net profit	-	(346)
Adjusted net profit for the year	<u>-</u>	<u>370,907</u>

The ESOS expired on 19 August 2003, and accordingly, there is no diluted earnings per shares for the current financial year.

14. INVESTMENT IN SUBSIDIARY COMPANIES (continued)

During the financial year, the Company privatised a quoted subsidiary company, namely, FFM Berhad ("FFM") by acquiring the remaining FFM shares not already owned by the Company by way of a members' scheme of arrangement under Section 176 of the Companies Act ("Privatisation of FFM"), for a consideration satisfied by the issuance of 102,126,817 ordinary shares of RM1 each in the Company and a cash consideration of RM2.00 per FFM share. Upon completion of the Privatisation of FFM, FFM was delisted from the main board of Bursa Malaysia Securities Berhad, and accordingly, the investment in FFM has been reclassified as unquoted shares in the current financial year.

The unquoted shares shown at valuation were revalued by the directors in 1981 based on the underlying net assets of the subsidiary company concerned. The 1981 valuation was a one-off exercise. It has never been the Group's policy to carry out regular revaluations of its investment in subsidiary companies and accordingly, the carrying amount of the revalued investment has been retained on the basis of this one-off revaluation as though it has never been revalued.

The subsidiary companies are listed in note 54.

In addition to the above, on 14 July 2000, a legal suit was filed by a third party at the High Court of Sabah and Sarawak in Sandakan against the Government of the State of Sabah (the First Defendant) challenging the alienation by the Sabah State Government to two of the Company's subsidiaries, Hibumas Sdn Bhd ("Hibumas") and Penumilek Sdn Bhd ("Penumilek"), of a total of 5,700 acres (2,307 hectares) of land situated in Sugut and Bonggaya, District of Sandakan ("the Land"). The Land forms part of a total area of 25,784 acres (10,434 hectares) alienated to Hibumas and Penumilek, who were named as the Second and Third Defendants, respectively.

Hibumas and Penumilek had on 12 September 2000 filed an application to strike out the plaintiff's suit. The court has on 25 January 2005, decided in favour of all three Defendants, and the claim by the third party was dismissed with costs.

Certain investments are carried at amounts in excess of their fair values. No further allowance for diminution in value has been recognised as the directors are of the opinion that the decline in value is temporary in nature.

- * It is not practical to estimate the fair values of the amounts due from subsidiary companies due principally to the absence of fixed repayment terms. However, the Company does not anticipate the carrying amounts to be significantly different from the values that would eventually be received.
- # It is not practical to estimate the fair value of unquoted investments due to the lack of quoted market values and the inability to estimate fair value without incurring excessive cost. Such investments are valued at cost subject to review for impairment.

Guarantees given

It is not practical to estimate the fair values of the guarantees referred to in note 46 due to the uncertainties of timing, costs and eventual outcome.

51. EVENTS PENDING COMPLETION

During the year, the Company entered into 2 Conditional Shares Sale Agreements to dispose of certain other investments in note 17 at a carrying value of RM12.049 million for a consideration which is yet to be finalised. The disposals have not been completed as at year end, as certain conditions precedent remain unfulfilled.

52. SUBSEQUENT EVENT

- (i) On 12 January 2005, a subsidiary company, Rimkus Limited, acquired 600 shares of IDR1 million each in PT Mentaya Sawit Mas ("MSMAS"), representing 60% of the equity interest of MSMAS, for a total cash consideration of IDR600 million. MSMAS, which is incorporated in Indonesia has obtained the 'Kadstral map' (ie. boundary approval) for about 16,867 hectares of land in Central Kalimantan which is proposed to be developed into an oil palm plantation.
- (ii) On 23 February 2005, the Board of Directors has proposed to increase the Company's issued and paid-up capital from RM592.750 million to RM1.186 billion by a 1 for 1 Bonus Issue of 592.750 million new ordinary shares of RM1.00 each in the Company (Bonus shares) credited as fully paid by capitalising RM520.000 million and RM72.750 million from the Company's share premium and retained profit accounts respectively. The new Bonus shares shall upon allotment and issue, rank pari passu in all respects with the existing shares except that they shall not be entitled to the final dividend for the financial year ended 31 December 2004. Concurrent with the proposed Bonus Issue it is also proposed to increase the Company's authorised share capital from RM1 billion comprising 1 billion ordinary shares of RM1.00 each to RM2 billion comprising 2 billion ordinary shares of RM1.00. The above proposals are subject to the approvals of shareholders, Bursa Securities granting a listing and quotation for the Bonus shares and any other relevant authorities.

53. AUTHORISATION FOR ISSUE OF FINANCIAL STATEMENTS

These financial statements were authorised for issue on 23 February 2005 by the Board of Directors.

STATEMENT BY DIRECTORS

PURSUANT TO
SECTION 169(15) OF THE
COMPANIES ACT, 1965

We, YM RAJA DATO' SERI ABDUL AZIZ BIN RAJA SALIM and DATO SRI LIANG KIM BANG, being two of the Directors of PPB Group Berhad, do hereby state that, in the opinion of the Directors, the financial statements set out on pages 73 to 143 are drawn up in accordance with applicable approved accounting standards so as to give a true and fair view of the state of affairs of the Group and of the Company at 31 December 2004 and of their results and cash flows for the year ended on that date.

On behalf of the Board

YM RAJA DATO' SERI ABDUL AZIZ BIN RAJA SALIM
Director

DATO SRI LIANG KIM BANG
Director

STATUTORY DECLARATION

PURSUANT TO
SECTION 169(16) OF THE
COMPANIES ACT, 1965

I, Leong Choy Ying, being the person primarily responsible for the accounting records and financial management of PPB Group Berhad, do solemnly and sincerely declare that the financial statements of the Group and of the Company set out on pages 73 to 143 are to the best of my knowledge and belief, correct and I make this solemn declaration conscientiously believing the same to be true and by virtue of the provisions of the Statutory Declarations Act, 1960.

LEONG CHOY YING

Subscribed and solemnly declared by the
abovenamed Leong Choy Ying
at Kuala Lumpur in the
Federal Territory on this
23rd day of February, 2005

Before me,

SOH AH KAU
Commissioner of Oaths
Malaysia
No. W315

We have audited the financial statements of the Group and of the Company set out on pages 73 to 143. The preparation of the financial statements is the responsibility of the Company's directors. Our responsibility is to express an opinion on the financial statements based on our audit.

We conducted our audit in accordance with approved auditing standards issued by the Malaysian Institute of Accountants. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes an assessment of the accounting principles used and significant estimates made by the directors as well as an evaluation of the overall presentation of the financial statements.

We believe our audit provides a reasonable basis for our opinion.

In our opinion:

(a) the financial statements have been properly drawn up:

- (i) so as to give a true and fair view of the matters required by Section 169 of the Companies Act, 1965 to be dealt with in the financial statements of the Group and of the Company;
- (ii) in accordance with the provisions of the Act so as to give a true and fair view of the state of affairs of the Group and of the Company at 31 December 2004 and of their results and cash flows for the year ended on that date; and
- (iii) in accordance with applicable approved accounting standards.

(b) the accounting and other records and the registers required by the Act to be kept by the Company and by the subsidiary companies of which we have acted as auditors have been properly kept in accordance with the provisions of the Act.

We have considered the financial statements and the auditors' report of the subsidiary companies of which we have not acted as auditors, and which are indicated in note 54 to the financial statements.

We are satisfied that the financial statements of the subsidiary companies that have been consolidated with the Company's financial statements are in form and content appropriate and proper for the purposes of the preparation of the consolidated financial statements and we have received satisfactory information and explanations required by us for those purposes.

The auditors' reports on the financial statements of the subsidiary companies were not subject to any qualification, and in respect of subsidiary companies incorporated in Malaysia, did not include any comment made under Section 174(3) of the Act.
